SAN FRANCISCO. Feb. 4.—Rard names and bitter denunciations created an excitand pitter denunciations created an excit-ing scene at a megting of the Board of Freeholders this afternoon. Mayor Adolph Sutro addressed the board, claiming that the setting aside of certain streets as boulevards was a part of the Southern Pacific's plan to block the construction of his road to the Cliff House. While he was speaking, Irving M. Scott, the head of the Julon Iron Works, and chairman of the Freeholders' Committee, which had re-served the streets as boulevards, entered. Sutro denounced him, Scott responding that Sutro was really in league with the Southern Pacific himself, although osten-

Scott shouted, "You are a liar," to which the Mayor replied at the top of his voice, "You are a lying dog and a Southern Pacific hireling."

The owner of the rig did not accompany the tourists. the sig did not accompany the tourists, but sent his driver along. They visited the park on the way to Sutro Heights, and, after viewing the took on which the seals used to sit, the party took lunch with the Mayor. All went well until Mr. Metzger's drag turned out of Kear-ney street into Bush on the way home. It was then about 4 o'clock and the side-walks were fined with people, watching

he Governor go by. The turn into Bush street was made at a rather lively clip, the driver doubtless wishing to land his passengers in from of the hotel with a fourish becoming their station in life. Instead, he landed them on the cobbles in the middle of the them on the cobbles in the unique of mostreet. It seems that the hind wheel on Budd's side of the wagon went to pieces without warning. The other occupants of the drag were reposing in picturesque attitudes on the legs of Mr. Budd, and he was powerless to check the mad flight of the team. A young man named George A. Kahn sprang to the heads of the horses and stopped them before any damage had been done, Mr. Rodgers's whiskers were slightly awry and His Excellency, as be-fore stated, was quite pale. Mr. Jacobs, who seconded the nomination of Budd for Governor, escaped without injury of any kind. So did the driver. The only dam-age done was to Mr. Mctzger's yellow drag, one of the wheels of which closed like a Japanese umbrella.

Dramatic Incident in the Million-

ted Press Leased-wire Service SAN JOSE, Feb. 4.—At the resumption of the trial of the Barron will contest in the Superior Court here today, the time was occupied in the cross-examination of Witness P. J. Sullivan, who, for many years, was the business manager and con years, was the business manager and con-fidential agent of the deceased millionaire. He testified that he had interviewed a number of parties as to all they knew about the condition of mind and body of the deceased, with a view to securing them for witnesses.

A dramatic incident was related that

occurred at the Cosmopolitan Hotel at San Francisco, when Mr. Barron was courting Miss Crooks, his second wife. He was about to take her to a grand party at the Olympic Club opening, when a former tover of the young lady threatened to shoot him. She went into hysterics, and had to retire, and Barron armed himself and to retire, and Barron armed himself. and remained in the room till 2 o'clock in the morning, when he ventured to go home in a back. An investigation of the business relations between the deceased and the witness brought out the statement that Barron invested \$25,000 in some lots on Perce street in 1882. The investment on Pierce street in 1883. The investment was for the witness in consideration of the fact that he received dittle or no compensation for his services. Statement of How They Got to

y Tolograph to The Times.
SAN FRANCISCO, Feb. 4.—(Specia SAN FRANCISCO, Feb. 4.—(Special Dispatch.) A sworn statement of the captain of the vessel that landed at Honolulu the arms and ammunition used by the Royalists in the recent attempted revolution has been received in this city and will undoubtedly create a stir in Washington when its contents are known.

Washington when its contents are known.

It gives many important facts not as yet known to the authorities at Washington, but which will sooner or later find their way to Congress. The statement is in part as follows:

"I am master of the steamer Wafmanlo. W. R. Castle has a mortgage on her. I am running her for myself. I bought her, but she is mortgaged to him. Last week (Thursday) I landed arms and ammunition from the steamer Wafmanalo at Waskiki. I was engaged to go and get them ten days before by W. H. Richard. He talked with me only once in the office of J. S. Walker. There was no one present but us. I was to receive \$10,000, of which \$1000 was to be in cash, to bring those arms ashore."

The captain sighted a schooner, whose name he did not know, and got the arms, which were put ashore in whaleboats, manned by natives. The revolutionary agent who dealt with him, Rickard, paid him \$20, which was all he received. The schooner which carried the arms was from San Francisco.

NEFARIOUS SCHEMES.

TRYING TO KILL THE WOMAN

Democrats Said to be the Movers o the Unwise Proceeding, and are Backed by the Liquor Interests.

By Telegraph to The Times.

SACRAMENTO, Feb. 4.—(Special Dis patch.) It was learned late tonight that a scheme is on foot to have the Senate Judiciary Committee kill the Woman Suffrage Bill by knocking out the enacting

e scheme, or at least to be cognizant efforts in that direction. It is stated of that the votes of only two more members of that committee are needed to carry out the scheme. Judge Spencer of Lassen, out the scheme. Judge Spencer of Lassen, champion of the measure, knew nothing of the combine against his bill, when interviewed by The Times reporter. He said that the bill when introduced in the Senate, was referred to the Committee on Election Laws, but on their recommendation, it was sent to the Committee on Judiciary, of which Senator McGowan is chairman. The latter has promised to netify him (Spencer) when the bill would be taken up, but he had not yet done so. In the House the bill has been read the first time and is the special order for wednesday.

Wednesday. An open fight is being made by As semblyman Reid (Dem.,) of Trinity semblyman Reid (Dem.,) of Trinity county, and Cutter (Rep.,) of Yuba, who are opposed to woman suffrage on general principles, and Wade (Rep.,) of Napa, who thinks any bill covering the subject would be unconstitutional and that the matter should be presented in the form of a constitutional amendment. Judge Spencer's programme, however, is to pass the bill first, it possible, thus allowing women to vote on the constitutional amendment, which could then be sub-mitted. He spent the afternoon examinment, is, of course, opposed to him, and that furnishes the only chance for the combine that he knows of. Rumor has it that the Democrats desire to have the bill defeated by bill defeated in such a way as to cause the blame to fall on the Republicans who pledged themselves to woman suf frage in their platform.

OFF WITH THEIR HEADS. So Much Laid Out for the Assembly Buckinghams.

SACRAMENTO, Feb. 4.-(Sp. patch.) The ax has fallen, and tomorrow nineteen cierks and messengers of As-sembly committees will wake up and find their official heads off. A joint caucus of the Assembly committees on Re-trenchment and Reform, Timothy Guy Pholps chairman, and Attaches Weyse chairman, was secretly held this evening at which Mr. Phelps presided. He made searching queries as to the need of employing the various attaches, basing hi inquiries on the sworn testimony of Chief Clerk Duckworth and Sergent-at-Arms

inquiries on the sworn testimony of Chief. Clerk Duckworth and Sergeant-at-Arms Parkinson, taken zecretly last week.

Mr. Weyse made a statement as to-how his committee came to indores the numerous appointments. He claimed that at the outset, the Committee on Attaches, mone of whose members had had legislative experience before, prepared a list of what was supposed to be a sufficient number of attaches for the needs of the Assembly, taking the Democratic list of last session as a basis. Subsequently, however, various committees, through their chairmen and members, had made a demand for more assistance in the way of clerks and the pressure exerted was so tremendous that the committee was forced to yield to the apparent necessities. Even then resolutions for appointments were presented by dozens in the Assembly, and referred to his committee. The members of the Retrenchment Committee attach no blame, whatseever, to Mr. Weyse, who is sincere in his desire for reform in this respect. Arguments were made by Sergeant-at-Arms Parkinson and some others, in favor of retention of certain employees. After three hours' work, nineteen victims were selected for slaughter, and the report giving their names will be presented, but it is learned that the Los Angeles delegation of ealary-grabbers is untouched. it is learned that the Los Angeles delegation of salary-grablers is untouched. The dopping-off of these nineteen super-numeraries means a saving of between \$600 and \$700 to the State, and when the Senate shall get into line a still greater maving will be effected. It was determined that those employees not stricken from the roll should be instructed to get in and do some work for their salaries hereafter.

A Coal Decision.

DENVER: Feb 4.—Judge Jehnson rendered a decision today in the suit of E. R. Taggart against Receiver Brooks of the United Coal Company, declaring that the slack coal combine which raised the price of slack coal in this city 50 cents a ton is illegal and requiring Brooks to sell coal to the plaintiff on the same terms as before the combine was formed.

They have made long and hard rides, changing horses at every practicable point. The trail led down the Suphur Spring Valley, the bandis never leaving the main traveled road for a distance of nearly-fitty miles. They were mounted on exceptionally good horses, with which they had just won a series of races on Mexican soil. These same animals carried them a distance of about forty miles, where they were met by a confederate near they were met by a confederate near Moore's ranch, with fresh mounts, and which point they made about daybreak Thursday morning, riding the distance in

ocut seven or eight hours. The trail indicates that for a distance up, and for the next twenty miles a lope was the gait. From Moore's ranch the trail led to the fastnesses of the Chiricanua Mountains, where the robbers are hidden in the almost inaccessible mountain of rock. It is known that food had been taken into this hiding place and stored at several different places in advance, and at this time of year, with water plentiful everywhere, they will be able to subsist for some time with the supplies on hand. Their horses were undoubtedly abandoned and the hiding place reached on foot from the base of the mountain. It is known beyond a doubt that but the two men, Wheeler and George, were the robbers, but it is equally certain that they have con-federates who assisted them in hiding the supplies and who will act as spies dur-

Not an act was left undone by Sheriff Fly and his ready assistants to run down the bandits, and everywhere he was met by willing hands to join in the search as guides and guards. From members of the travel it is learned that no officer was more zealous or active than Sheriff Fly, despite the efforts of some to belittle his unusual efforts to apprehend the wrong-doers. It is the firm belief that the men will either be captured or killed, as the with a will until the end.

MEDICAL SCANDAL,

In Which a Prominent Doctor is

Involved. By Telegraph to The Times. NEW YORK, Feb. 4.—(Special Dispatch.)
A London special to the Sun says that the
members of the British Medical Associa-

members of the British Medical Association received today a, printed communication from Dr. Lawson Tait of Birmingham, who is, perhaps, the most eminent
surgeon in the country.
The pamphlet makes public property of
a personal scandal which will cause the
greatest sensation that has ever agitated
the English medical profession. The
story is told in letters which passed between Dr. Tait and Dr. E. W. Cushing of
Boston, editor of the Boston Medical and Boston, editor of the Boston Medical and Surgical Journal. Last summer this para-graph appeared in that journal: "In the light of facts placed in evidence concerning Tait, his statistics have far less weight with the surgical world than was the case

a year or two ago."

Dr. Tait at once wrote Cushing, demanding an explanation: "Would you be kind enough to inform me what the facts are, where they are placed in evidence, and the authority, for I am unacquainted with anything which justifies suc

Dr. Cushing replied he had been in formed by a member of the profession in high standing that Dr. Tait had been compelled to resign his professorship and place in a celebrated hospital because he had betrayed a young woman nurse. To this Dr. Tatt responded with equal trank-ness, in which he denounced the story as a base lie, and showed how two women. as a base lie, and showed how two women, nisters, entered into a scheme to black-mall bith. One nurse was dismissed for insubordination and the other was a woman en whom he had performed ovariotomy. They laid claim to 18,000 pounds as hush money, but never got a cent. The doctor finally drove the blackmatters into a corner and compelled them to sign a statement that they had no claim upon him. In response to Dr. Tait's anxious request for the name of the informant, Dr. Cushing replied it was Dr. Ernest Hort, editor of the British Medical Journal, now in India. He related the story while the two were in attendance at the international medical congress, World's Fair.

MILWAUKEE, Feb. 4.—An electric car on the Russell-avenue line, filled with people, went through the open draw of Kinnickinic bridge this morning. The weight of the car broke the ice and the car went to the bottom of the river.

The ice broke the windows of the car, which

which stood on end, and only partially filled with water. The confusion was such that mobody could tell an hour after such that mobody could tell an hour after the catastrophe how many people had host their lives, but it is estimated that at least six besides the motorman are dead. There were ten or twelve people in the car, the exact number being unknown. Six were taken out alive, the others are all dead. Those rescued were: W. P. Severy, hand cut; A. O. Ertel, G. W. Chase, H. Kuehne, R. Nerand, Ells Wacchelz, hurt about shoulder.

The dead whose bodies have been recovered are; Miss Ehlmann, kindergarten teacher tweltin district primary sobool, a daughter of Prof. Ehlmann, director of music in the public schools, and John Kennedy; motorman, Miss Schmidt-Kunz, employed at the National Knitting Works.

The hridge had been conned to permit

works. The bridge had been opened to permit the passage of the fire-boat Foley, which was breaking the ice in the Kinnickinsc. The Foley's crew rendered valuable assistance. The accident was due to the carelessness of Motorman Kennedy, who, however, stuck to his post and was drowned.

CHICAGO, Feb. 4.—The sharpest cold wave that has visited Chicago for twentytwo years made its appearance last night, and is still on with unabated vigor. The mercury in the office of the Signal Service last night fell to 13 deg. below, the coldest on peord since 1873. The thre-mometers owned by private individuals made the cold from 4 deg. to 5 deg. worse. Several cases of freezing were repor a flat at No. 342 West Brighton street; M. Carmody was found frozen to death. The police have rounded up any number of gentlemen, who, having filled themselves with red liquor, had selected afleys and vacant foots as places to slumber.

A number of them are in the hospitals for treatment for frozen feet and hands. The weather office tonight predicts four days more of the same kind of thing. Reports from many places in Illinois, Iowa, Wisconsin and Michigan show the same state of affairs, the mercury ranging from 8 below in Southern Illinois, to 20 below in Northern Wisconsin.

A lively tilt occurred in debate over the bill of Judge Spencer of Lassen, allowing appeals from commitment for contempt where such contempt was not committed in presence of the court. It was suspected that the bill was drawn in the interest of the hydraulic miners, who have sometimes been tied up in other countles from where they have been operating by those opposed to such methods of mining, and when Judge Spencer made a vigorous speech in support of the measure, saying that judges were often petty tyrants, Mr. Cutter of Marysville, as soon as he could get the floor, proceeded to "roast" the bill, which, he said, would allow hydraulickers to mine defiance of the Caminetti law, dec of the Supreme Court and of the Circuit Court of the United States.

Mr. McKelvey of Orange, who, at the beginning of the session, introduced a bill similar to the one under discussion, and which he subsequently withdrew in favor of the later bill, replied with warmth to the aspersions which he thought had been cast on him by the opponents of the bill. He said he was from Orange county and had never seen a hydraulic miner when he introduced his bill. Yet he had been de nced for having presented an innocent. He asked if all the counties of the State should bow down in the mire befor Yolo, Sutter and Yuba every time the lat ter counties raised the cry of "hydraulic mining." He said he did not think they Furthermore, as to the claim that the courts would themselves become ob-jects of contempt if they were restrained from carrying out their orders, he said that if they continued to carry out contempt proceedings in the way they have been doing they would merit the contempt of all good citizens. A bill introduced by Mr. McKelvey of Orange provides for the consolidation of the six brigades of the National Guard into one brigade, to be composed of five regiments, each containing twelve companies. Four batteries of artillery and one troop of cavalry are provided for. It places all of the present brigade officers on the retired list and such field officers who are not continued in the service are to be retired also upon application. Otherwise, if they chose to remain on the active list unit their commissions expire, they will lose their milicary titles and their right to wear gale uniforms on public occasions. Mr. McKelvey claims that this reduction of the number of brigade organizations will reduce the monthly expenditure for sta-

PRACTICAL JOKE. That's What the Chicora Looked Like.

Associated Press Leased-wire Service.
CHICAGO, Feb. 4.—The belief is growing apace that the reported find of the wrecked take steamer Chicora originated in the mind of some heartless practical joker, who, having once set the yarn to travel-ing, found thousands of ready believers to spread and exaggerate it with every repetition. The search was again taken vessel men unite in pronouncing it next to useless. Absolutely nothing was found up to the time the disappointed searchers returned last right, indicating that the vessel's hull was in the vicinity indicated by those claiming to have seen it, and, while further didings are anxiously awaited, it is with a feeling of hopelessness and disappointment. Especially is this the case at Benton Harbor, Mich., and other places where the crew of the dil-starred Chicora resided. The news of the finding of the dismantied vessel and the rescue of her crew was revived at Benton Harbor and St. Joseph during memorial services for her dead in the churches, and created the wildest enthusham. Hundreds wept for essel men unite in pronouncing it next her dead in the churches, and created the wildest enthusiasm. Hundreds wept for joy, yet feared the news too good to be true, as, alas, seems to have been the case. Special trains were arranged for the conveyance of hundreds to meet the supposed dead men so miraculously yielded up by the chilly waters; bells were rung; whissles scheeched; and bonfires lighted, but their premature joy seems doomed to despair. Here and there, however, is found a man sanguine enough to believe that the glad news will be verified, but to such thus far can only be vouch-safed the report of the captain of the rescuing tug Perfection, when she returned last night: "We found nothing whatever; on every hand a waste of slush ice; a few seagulls, desolation—stience."

Judge Grant said that when juries refused to convict upon the testimony of three eye-witnesses, it was not probable that they would convict where the testimony only tended to connect the defendants with the actual perpetrators of the crime. Judge Armstrong thought that if the jury had been put in charge of the sheriff, a different verdict might have been reached. But the court thought that the result would have been the same had the jury been in charge of the Almighty. In accordance with the motion of the District Attorney, the defendants were discharged.

REED'S PLAN.

> The Silver Men to Make an Effort to Report a Silver Bill to the Senate.

Treasury Officials Think Secretary Carlisle's Surplus Estimate is a Conservative One-Receipts and Expenditures.

WASHINGTON, Feb. 4.—The calculation washing ION, Feb. 4.—The calculations of the supporters and opponents of the new administration financial bill were upset today by the interjection of a new factor in the campaign. Mr. Reed of Maine, the Republican leader, brought forward a new plan, for which he is endeavering to enlist the antire strength of the oring to enlist the entire strength of hi stitute for the administration scheme if he thinks his plan can command sufficient support to make it a factor in the fight. There are but two sections to the Reed plan in the form in which he has submitted it to his colleagues. The first proposes to restrict the law of 1875, which authorizes the Secretary of the Treasury to issue bonds to redeem the greenbacks by 3 per cent, honds. by 3 per cent. bonds. The second sec-tion authorizes the Secretary of the Treas-ury when there is a deficit, to issue certificates of indebtedness to pay current ex-penses, the certificates to be issued in sums of \$25, \$50 and \$100, and any multiples thereof, bearing in and payable in coin.

and payable in coin.

The bill, as Mr. Reed explained to the Republicans whose support he sought, is but a temporary expendient to tide over the present distress. The substitution of "coin" for the gold provisions of the administration is expected to win for it toleration, if not support, of the free silver men who bitterly oppose all propositions to discriminate by stipulation in any bill in favor of gold. Its comparative simplicity, it is expected, will commend the bill to the House in preference to more complex plans.

bill to the House in preference to more complex plans.

Mr. Reed devoted himself assiduously throughout the day to cloak-room consultations with the Republicans. He first endeavored to elicit the opinions of the gold men, and then tackled the silver men. The measure of his success is difficult to estimate. The plan is to offer the bill as a substitute for the administration bill, and by polling the solid Republican vote while the Democrats are divided on the administration bill, make it the most formidable proposition in the field, and performidable proposition in the field, and pern in the field, and per haps induce the Democratic opponents of the administration bill to rally to its

silver advocates on the committee to secure the reporting of a free silver bill. Inquiry among the members of the committee failed to develop absolute assurance
that the effort would be made, but enough
was said in many quarters to indicate that
the general supposition was not without

It is urged that the customs duties on sugar alone should bring at least \$35,000,000 during the next elever months, and that the revenue from the in-come tax is likely to reach \$40,000,000. The receipts from general customs and from whisky withdrawals are expected to from whisky withdrawals are expected to materially increase from now on, which, it is believed, will bring the receipts for the twelve months up to about \$380,500,000. The disbursements for the year, it it chought, will not exceed \$351,000,000, leaving a surplus, after deducting the \$7,000,000 deficit for January, of \$422,500,000. The men who will underwrite the new tasue, according to the best information of Wall street, are the Rothechilds, represented here by August Belmont, J. Several important factors have contributed into bringing the local financiers into the deal. In the first place, neither the Morgans nor Belmont have much gold here, and hence would have to draw in the banks, so that the latter would have to figure in the transaction in that way. In the next place the Rothschilds, so it is stated, are just as anxious to have the local moneyed men in the deal as the latter are anxiotis to be in themselves.

SAN FRANCISCO, Feb. 4.—Chief Arthur has been in conference with the Executive Committee of the Brotherhood of Locomotive Engineers all day. No final decision has been reached. The Southern Pacific Company refuses to recede from its position, and its officials amounce that the cut in wages would be enforced. Arthur has advised the engineers not to strike, and it is understood that half the members of the Brotherhood favor following his advice. Others are vigorously advocating a strike, and have succeeded in having appointed a sub-committee to confer with the Executive Committee of the A.R.U. As a result, the engineers have announced that the A.R.U. representatives agreed to sustain the engineers in case

Both Chief Arthur and Chairman Myers of the engineers' committee denied that any strike was contemplated. They say that their complaints will be presented as business men, and in the event of a refusal to adjust matters their future course will be guided by business principles. Both sides express the belief that there will be a peaceful settlement of the difficulty. The engineers disayow any knowledge of the peaceful settlement of the difficulty. The engineers disavow any knowledge of the whereabouts of Eugene V. Debs, recently reported on his way to the Coast to take part in what was termed the impending war. SAN JOAQUIN ROAD.

Subscriptions Still Coming in-Sixty Thousand Yesterda;

associated Press Leased-wire Service. SAN FRANCISCO, Feb. 4.—The Citizens' Committee secured subscriptions aggregating \$60,000 today for the San Francisco & San Joaquin Valley Railroad, a total of \$1,650,000. Subscriptions previously reported, \$1,591,-

200; subscriptions reported yesterday, \$51, 500; Hibern's Bank donation, \$50,000; total, \$10,02,500.

Fifty thousand dollars is lying in the Hibernia Bank, payable on demand to the San Francisco and San Joaquin Valley Rallroad Company, upon its incorporation.

This sum was voted by the board of directors of the bank today as a gift, not a subscription. There were many reasons why it was decided to take this course. One was the constitutional provision relating to the proportional responsibility of shareholders in corporations; others were sections of the Civil Code relating to investments of banks.

For all that, the sum voted is not regarded by the directors of the Hibernia Bank as a present to a private, or even a quasi-public institution, but as the wisest investment, in the broad sense of the term, that could have been made. Holding \$22,000,000 in mortgages in San Francisco, the bank's interests in its prosperity is not exceeded by that of any institution or individual in this city, and it is the well-grounded opinion of its managers that its future is closely allied with the construction of the competing road.

NEW YORK, Peb. 4.—The meeting at Cooper Union tonight was called by the joint consent of the Good Government Club, the City Vigilance League and the German-Aniertosin Reform League. The speakers were principally from the ranks of the reformers and not the straight Republican ranks. Every reference made to the police department and its proposed single head was met with a shout of assent.

Charles Stewart Smith was called upon, and made a vigorous speech in behalf of immediate action by the Legislature upon the power of removal bill, the police fustice bill and the bill reforming the public schools. Resolutions were slopped with but one dissensing voice in consonance with Chairman Smith's statement of the purposes of the meeting, and denouncing partisanship and bossism in municipal affairs.

Dr. Parkhurst denounced T. C. Platt and James C. Carter, and alluded to them as the enemes of the reform movement. Other speakers were Cornelius N. Pliss and Gen. Wagner Swayne.

Court to interfere in the matter until after the case should be finally disposed of by the district courts.

Chief Justice Fuller, who delivered the decision, says if the final decision should be against him, it would be competent for Chapman to apply for a writ of error to the United States Court, and in case it could not be granted, to apply for a habeas corpus, but he thought the ends of justice would be better subserved if there were no interference at this time. Chief Justice Fuller said the court had been unable to see that Chapman's case presented any exceptional circumstances as set up in his petition. The application for a writ of habeas corpus was also denied in the case of J. S. Schriever on the same grounds, the court remarking it was essentially similar to the Chapman case. THE COUNTRY SAFE. Secretary Carlisle Badly Frightenend but Still Lives.

Associated Press Leased-wire Service NEW YORK, Feb. 4.—A special dispatch from Washington to a morning paper says that Secretary Carlisle narrowly escaped being knocked down by a reckless sleigh-ing party this afternoon while he was on his way to the White House to consult with the President about a financial question. The Secretary was walking along Pennsylvania avenue, and was just about to cross Executive avenue, which separates the treasury from the White House grounds. He looked solemn and oblivious of what was passing before him. Sud-

of what was passing before him. Suddenly a high-stepping horse, drawing a cutter containing two young people, dashed across the street immediately in front of the Secretary. He was badly frightened, for he barely escaped being run over.

He fell backward toward the curbing with a start that shook his hat from his bead, and it was several seconds before he recovered sufficiently to remark that he had a very close call. A treasury policeman glared indignantly at the rapidly-disappearing sleighing party and then escorted the Secretary across the street in safety.

All the officials are extremely reticent on the subject of the decline to either affirm or deny any of the rumors brought to their attenion. One rumor, which had are apparently good basis, was that the bonds for the new issue were already being printed at the Bureau of Engraving and Printing, but, like the others, it could not be confirmed. The others, it could not be confirmed. The consensus of opinion is that a bond issue to foreign purchasers, directly or indirectly, will be made very soon, and that all arrangements to this end are substantially complete. The amount which the administration contemplates issuing, and may give notice of at any time now, is \$100,000,000, to run thirty years. Arrangements, it is believed, have been practically concluded, assuring the government that these bonds will be paid for with foreign gold.

VERY BROAD INSINUATION FROM THURSTON.

Secretary Gresham Serenely Ignores it, and Tells the Minister He Had Better Bead the Newspapers.

Associated Press Lecsed-wire Service.

WASHINGTON, Feb. 4.—In the Hawaiian correspondence submitted to the House today Secretary Gresham states that the department had no information in regard to arms having been furnished by British subjects to persons in rebellion against the government of the Hawaiian Islands, but in a telegram from the United States Minister at Honolulu, January 11, forwarded by way of San Francisco, Mr. Willis says: "Arms are reported to have been brought from Vancouver by the Norma."

Following this correspondence with Mr. Willis, there was an exchange of notes between Secretary Gresham and Mr. Thurston, the Minister here, which is interesting mainly because of the insinuation by the latter that the presence of any American warship at Honolulu would be acceptable. Mr. Thurston wrote January 20:

tion by the latter that the presence of arr American warship at Honolulu would be acceptable. Mr. Thurston wrote January 20:

"Sir: I have the honor to inform you that I have received from my government telegraphic communications stating that the insurrection at Honolulu was broken; that several of the leaders and the remaining followers were fugitives in the mountains, and the British commissioner at Honolulu, Mr. Hawes, has called upon the government of Hawaii to give him assurances that no capital punishment will be inflicted upon the insurrectionists, there being fifteen Englishmen under arrest, which requested assurance the government has refused to give him. A man-of-war at Honolulu has been recently the subject of discussion in the press and elsewhere. It does not, lie within my province to suggest any course of action on the part of the United States concerning such subjects. I feel, however, that it is due your government and to the large American population and property interests in Hawaii to state that, although the government of Hawaii is, and will continue in the future as it has in the past, fully able to maintain itself from the attacks of domestic enemies, in view of the serious nature of the charges now pending against a large number of both foreigners and natives, and of other complicating conditions the state of affairs at the Islands is critical; as in the event of further insurrection or complication, although the government will use every endeavor to protect foreign citizens and their property it is not impossible that sudden contingencies may arise, or isolated acts of violence take place against which the government, with its police and military force may temporarily be unable to afford protection."

In 'his reply Secretary Gresham, January 20, said:

"On receipt of a dispatch from Mr. Willis yesterday morning on the subject of the uprising which was immediately given to the press, a warship was at once ordered to proceed from San Francisco to Honolulu, to afford needed protection to any

SILVER ADVOCATE.

Wyoming's New Senator Favors the Associated Press Leased-wire Service.

CHICAGO, Feb. 4.—S. C. D. Clark, lately elected Senator from Wyoming, was in Chicago last night, on his way to Washington, to take his seat. He will arrive at the national capital not later than Thursday next, and will at once take the cetter of office. In the Wyoming Senator the oath of office. In the Wyoming Senator the silver men of Congress will have a strong advocate, and his vote can be counted upon as against the recommendation of the President's recent message. "The sentiment among Wyoming peo-ple," Mr. Clark said, "is strongly against a large issue of bonds to maintain the gold standard. They want some practical steps taken now toward bimetallism, and will oppose any movement which will simply fasten the single-money standard upon the country."

simply fasten the single-money standard upon the country."

Mr. Clark expressed himself strongly on the subject of selling bonds at the present time to maintain what he termed "the monometallism of gold."

Regarding the new Senators from the West, Mr. Clark noted a great change from what was once the almost universal custom from the new States west of the Rockies. "Nearly, if not all, the Senators elected this year," he said, "are poor men. In no single exception were the Senators millionaires or elected by the influence of money.

militoraires or elected by the influence of momey.

"If there had been a milition dollars for the purchase of votes in Wyoming," Mr. Clark added, "not a dollar could have been used corruptly. I think the same is true with all the new States. We have got over all the rough sentiments of early times now. We are down to hard, practical business.

got over all the rough sentiments of early times now. We are down to hard, practical business.

"Perhaps the bard times here had much to do with the change in the far West, but at any rate it has been most marked since last fall's elections. If Utah is admitted, poor men will come to the Senate from that State also."

Mir. Clark was hopeful that the Carey law for the irrigation of arid lands would be accepted by Wyoming. He believed the State would accept the 1,000,000 acres of arid lands, as provided in the Carey law, and would take steps to have the land irrigated by private corporations. In the Big Horn Valley alone, he had been told, a single irrigating ditch would provide water for a vast region. It was his opinion that if the State succeeded in irrigating the arid lands given it under the Carey law, the general government would turn over all the arid lands within the berders of the State. All the objections against the projects for irrigation being undertaken by corporations, or the ground that it tended to a vast system of land-iordism, Mr. Clark believed could be overcome by the Wyoming Legislature, which is now considering a number of bills, covering the grant in the Carey law.

The declaration of the Northern Pacific that it would not allow the Union Pacific to participate in the Puget Sound business until it had withdrawn its refusal to open up the Oregon Short Line for through business, was made Saturday afternoon before the Union Pacific expressed its willingness to accede Pacine expressed its winingness to accede
to the other lines. The change, in the
attitude of the Union Pacific people induced a corresponding change in the sentiments of the Northern Pacific, and there
seems to be no longer any reason why
the Union Pacific should remain outside

ARMY BALLOONS.

Experiments to be Made by the Sig-

Experiments to be Made by the Signal Corps.

Sociated Press Leased-wire Service.

NEW YORK, Feb. 4.—A special dispatch from Washington to a morning paper says: The army is to have another balloon, and it is thought the aeronaut engine of war will be made in this country, Capt. Glassford of the Signal Corps, who is stationed in Denver, has recommended that the material for a balloon be purchased and that the construction be done at Fort Logan, Colorado, where there is a company of expert balloonists attached to the Signal Corps. He estimates the cost of a balloon made in this country at about \$700, or about one-third of the amount which was paid to the French maker of the balloon at present used in the service.

Gen. McCook, in command of the Department of Colorado, has approved the recommendation, and it is likely that Gen. Greely, the chief signal officer, will instruct Glassford to purchase the material needed. It has also been decided to build a gas plant at Fort Logan, Colorado, where gas stored in iron cylinders will be prepared for shipment to any point where a balloon may be located. Capt. Glassford, who may be called the balloonist in our army, is greatly interested in this feature of the signal corps. He believes that there is a great deal in the subject and at no distant day those governments who spend money for experiments, such as France, will go into the matter more deeply, following the line of Maxim's investigations.

The balloon is of little value except as a captive observation car. Its bulk presents too large a surface to the wind to make it manageable for war purposes. But as a means of observation it has proved of sufficient value to warrant the construction of a second balloon for use in service. Experiments were made as far as possible with the existing balloon, but with the limited means at hand it is only possible to make a few ascents at favorable seasons, more as an instruction for the men than to develop any theories of arial navigation.

STRANGE COINCIDENCES. Parentless Brothers Work Unknow

ingly Side by Side.

PORT JERVIS (N. Y.,) Feb. PORT JERVIS (N.Y.,) Feb. 4.—The wedding of the Rev. George Washington Scarlet, pastor of the Reformed Church in New Purley, and Miss Laura Tauice, the nineteen-year-old daughter of his housekeeper, adds another link to the chain of romance with which the dominie is connected. His life has been a continued romance from the time he and his brother, John Adams Scarlet, were found argentices at a tender served takes to

brother, John Adams Scarlet, were found parentless at a tender age and taken to an orphan's home in Newark, N. J. Their antecedents seemed to be shrouded in mystery, and they were too young to tell their own story or give their names. Because of the red kilts which they wore they were called "Scarlet," and the name George Washington was given to the elder, while John Adams was the honored name applied to the younger.

A Hunterdon (Pa.,) county farmer visited the place with a view to taking a lad home with him. George Washington was recommended. His bright eyes and good looks gave him a decidedly prepossessing appearance, and he became a member of this man's household. It happened that a year later another farmer from that county was in need of a boy and applied to that institution, and John Adams was fortunate enough to secure a private home for himself.

For two years the boys were uncon-

nate enough to secure a private home for himself.

For two years the boys were unconsciously within a few ailes of each other. They were sent to Rutgers College. There they made good records and were encouraged to study for the ministry. Their professional studies ended, they married sisters and entered upon the active duties of their chosen calling.

The first wife of the Rev. G. W. Scarlet died about six months ago from injuries sustained in a fall. The sentiment of the congregation against the dominie for marrying his housekeeper's daughter, especially so soon after the death of his wife, was so strong that he resigned his charge. The Rev. John Adams Scarlet is in Gilboa, N. Y.

AMERICAN CATTLEMEN.

The Mexican Government May Seize Their Stock.

YUMA (Ariz..) Feb. 4.-The American cattlemen who have for years ranged their stock on the extensive lands of the Blythe concession in Lower California near here are likely to lose all their stock through seizure by the Mexican customs author-ities. Until the boundary line was recently surveyed, no one knew exactly where the line was, and cattle roamed over the whole country with perfect freedom. About three months ago, however, the Mexican government established civil au-thority over the northeastern part of Lower California, and the vicinity soon swarmed with judges, sheriffs, customs in-spectors and other petty officials. A month ago a round-up was ordered, and the re-sult was that all the stock was seized and

confiscated.
Joseph S. Carter, an American who has been in the country ten years and whose stock was all born on Mexican soil, was arrested and is now in jail at Ensenada.
Donald Moore and William Carney, two other Americans who were driving through the country looking for a range, were also arrested and are in jail. Their entires cuttists were confiscated. Charles were also arrested and are in just-entire outfits were confiscated. Cl Baker, Peter Johnson and some of left the country, but all their stock the hands of the Mexicans. The ste valued at \$15,000. It will be drive Ensenada and sold.

January Statement in Detail Aggregate printed in January 454,385 Net daily average circulated 14,470

Net increase over December daily average, 547 copies. Our guaranteed circulation ex-ceeds the combined circulation of all other Los Angeles daily newspapers.

NOTE.—Attention is directed to the fact that the NET as well as the GROSS circulation of THE TIMES is shown regularly in these monthly statements. The "returns" are habitually small, but are always carefully reported and deducted from the gross circulation. The natural fluctuation, up and down, according to the times and seasons, is thus truly exhibited.

THE TIMES is the only Los Angeles paper which has regularly published sworn statements of its circulation, both gross and net, weekly, monthly and yearly, during the past several years. Advertisors have the right to know the NET CIRCULATION of the medium

Shaving With Glass.

Shaving With Glass.

(Pearson's Weekly:) The natives of Jamaica have no need to buy soap, for the woods shound in plants whose leaves and buds supply very well the place of that indispensable article. Among the best of these is the soap tree, so called, though it is more of a bush than a tree. Its bulb, when rubbed on wet clothes, makes a beautiful lather, which smells much like common brown soap.

The Jamaica negroes, some of whom are great dandles in their way, make a soap out of cocoanut oil and home-made lys; and a fine soap it is, smooth and fragrant. This cocoanut oil soap is used for shaving.

When a man wishes to shave he starts.

This cocoanut oll soap is used for shaving.

When a man wishes to shave he starts out with his cocoanut shell cup and his dookey tail brush and a bottle. It is never any trouble to find an empty bottle in Jamaica, even in the mountains. At least twenty generations of thirsty people have lived there, and thrown away the empty bottles.

The man carries no mirror, because he has none to carry. Not one negro cabin in a dozen has even a cheap looking-glass. But nature provides the mirror as well as the soap. The man goes to a convenient pool in the mountain stream, where the water is still, and there is his mirror.

He breaks his bottle on a stone and picks out a good sharp piece. Then he lathers his face profusely, and begins to scrape away with his piece of glass, which works almost as well as a sharp razor.

The men rarely cut themselves in the operation. "At first," says a writer, "I trembled for them, but afterward I tried the method for myself and soon became almost an expert at it."

The Rev. Milton Bird Gott, who is about to essay the role of Dr. Parkhurst in St. Louis, is pastor of the First Methodist Episcopal Church, South, of that city, and for nine years of his earlier life, before he entered the ministry, was himself a fellow of the wildest cort. He will be assisted in his work by the Rev. A. H. Kaylor the Kansas evangelist.

OFFICE OF THE TIMES.

LOS ANGELES, Feb. 4, 1894.

As a rule citizens pay too little attention to the manner in which county and city money is being expended. This offers an inducement to carelessness or extravagance on part of the Supervisors and Councilmen. It must, however, be said that, from the manner in which these expenditures are now made, the public has little chance to learn any of the details. The Investor of this city has been doing good work during the past few weeks in publishing a detailed list of demands audited and approved by the Board of Supervisors. Commenting upon this subject, the Investor says:

"The system under which demands are allowed and paid in the county government appears to be defective in that it fails to provide the check upon expenditures that should exist. We referred to this matter last week in speaking of the system prevailing in the county school department. "The Supervisors are required by the provisions of a law which they quietly ignore, to publish a record of their proceedings. One important part of such a record OFFICE OF THE TIMES.

provisions of a law water they quety ig-nore, to publish a record of their proceed-ings. One important part of such a record would be the statement from meeting to meeting of the demands upon the treasury which they allow; but, until the Investor

which they allow; but, until the Investor undertook the task, there has been no such statement forthcoming.

"The advertising contract made by the board with the Evening Express stipulates for the publication of a report of the doings of the board, but there is no evidence that any such report has ever been furnished to the paper for publication."

Now that it has been proved that the cooperative plan for marketing oranges, when properly managed, can be of great benefit to the growers, why should not the deciduous fruit-growers of this section get together and co-operate for their mutual benefit in the same manner?

The deciduous fruit industry has grown rapidly in Southern California during the past four or five years, and promises to grow still more rapidly in the near future. It has been found that such fruits as apricots, peaches, prunes and wainuts, when carefully cultivated and properly attended to, are capable of yielding almost as large profits as the average orange orchard, with the additional advantage that they can be grown on cheaper land and that it is not necessary to wait so long for returns; also that they need not be marketed at once if prices are unfavorable, but can be dried and kept for a good market. The growers of these fruits should not wait until the product is too large to be handled successfully, but should organize at once and meet regularly to discuss the question of markets. The fruit exchange in Santa Clara county has accomplished a vast amount of good for the growers of that section, and has undoubtedly saved them many thousands of dollars.

GENERAL BUSINESS TOPICS.

For some time past the authorities of Ohio have been waging a persistent war-fare against adulterations in foods and drinks. Of late the wine that is sold In that State has been under investiga-tion with the result that practically all the wine on sale in Ohio has been con-demned as unfit for use. The following

demned as unfit for use. The following dispatch from Columbus, O., to a Cincinnati paper shows that dealers are considerably worked up on the subject:

"The druggists have raised an important question in connection with the rulang of the department on what constitutes pure wine. The druggists insist that there is absolutely no pure wine, actant question in connection with the ruling of the department on what constitutes pure wine. The druggists inelsit
that there is absolutely no pure wine, according to the standard laid down. It
would require, they claim, five years before the Ohio producers can put a wine
on the market under the ruling. In the
face of this is the dilemma that under an
act of Congress secured by the wine producers of California they are permitted
to use distilled grapes in fortifying their
product. Commissioner McNeal still adheres to the policy that pure goods can
be made and will not allow the sale in
Ohio of compounds and adulterations under the name of wine."

This ought to make a good opening for
California light wines. There is plenty
of, pure wine in this State. In fact, all
our light wines are pure. At the prices
which have been prevailing for wine during the past few years—say from 7 cents
per gallon upwards—grape juice has been
cheaper than anything with which it
could be adulterated, except water, and
even that would not effect much saving.

To judge from the above quoted dispatch the people of Ohio are unacquainted
with pure light wines and only know the
sweet articles such as our sherries, ports,
angelicas and muscatels. It might pay to
aship a carload of California clarets and
white wines as an experiment to Ohio.

Shares and Money.

Associated Press leased-wire Seroics

NEW YORK, Feb. 4.—The fact that the Secretary of the Treasury had not issued a call for proposals for the new government loan this morning had a depressing effect on the share speculation. This feeling was quickly reflected in the inauguration of a sharp selling movement, which continued in force during the first hour and led to a very general decline, ranging from '46124' percent, the latter in General Electric, which was sold down. Chicago Gas broke 1½ percent. Rock Island and Louisville and Nashville loast 1 per cent. Burlingsion and St. Paul. '5.* Northwestern. '5, and Sugar '2 per cent. The greatest decline of the entire market was 2 per cent., in Union Pacific, due to liquidation for both home and foreign accounts, induced by the practical defeat of the funding bill in the House of Representatives Saturday. Distilling was bught freely on the announcement that Judgs Grossup at Chicago had removed. President Greenhut from the receivership of the company, and that two receivers had been appointed who had no environment that Judgs Grossup at Chicago had removed. President Greenhut from the receivership of the company, and that two receivers had been appointed who had not not a change, the street having recovered from the sarly despondency and resuming its faith in the anticipated bond issue. As a consequence, prices mounted up with buoy-small traders. About 11 o'clock the temper of speculation in the general market underwent a change, the street having recovered from its early despondency and resuming its faith in the anticipated bond issue. As a consequence, prices mounted up with buoy-snat step. Sugar advancing 2½ per cent. Chicago Gas and Northwestern. 1½: Louisville and Nashville, 1½; Rock Island, 1½; Burlington, St. Paul and Western Union, 1; Union Pacific, 4, and the rest of the list ½4½ per cent. Visible Supplies.

NEW YORK, Feb. 4.—The visible supply of grain Saturday, February 2. as compiled by the New York Produce Exchange, was as follows: Wheat, 83,726,000 bushels, a decrease of 1,289,000 bushels, corn, 12,720,000 bushels, an increase of 65,000; cats, 7.688,000 bushels, a decrease of 229,000; rye, 404,000 bushels, a decrease of 22,000 barley, 1,788,000 bushels, a decrease of 275,000 bushels.

Times by Lawson. The virtual defeat of the Pacific Railroad Funding Bill assisted in the decline. Union Pacific dropping to 33. There was a sharp rally at the close all around. Much uncertainty still exists about the expected loan, the situation apparently being that the leading financier- here are awaiting a decision from Washington as to the terms of the issue. Only a small amount of gold went into the Bank of England, because some holders are keeping back supplies on the possible chance of an American demand. Consols were better.

CHICAGO. Feb. 4.—Wheat struck a slow gait at the opening, which could not be aroused into a quick step during the entire forenoon. The statistics connected with the day's movement at the principal markets were generally favorable to the bulls, with the exception of the very slender clearance of wheat and flour 170% the Atlantic seaboard. Minneapolis and Duluth reported 173 cars received today, as against 248 on Monday of last week and 371 cars a year ago. The Liverpool markets were quoted firmer at the opening. Liverpool stocks of wheat increased 7000 tons last week. The quantity of wheat and flour on ocean passage was reported as having decreased 1,043,000 bushels. The price of May wheat at the opening ranged from 52%,652%, but after that and up to the completion of the visible-supply statement the tendency was slightly upward. It reached 534,653% about 11:30 o'clock, and about noon it again reacted to 55%. Under moderate selling the tendency was generally downward during the last hour, May closing at 52%. Corn did not show any inclination to move far from the point it stopped at on Saturday. The opening sales were at from 439,42% for May, and during the forenoon firmness in wheat it rose to 43%,634%. The receipts here and elsewhere were light. May closed at 43. Oats were only fairly active, and, although prices showed a slight sheline, the market held comparatively steely May started at \$284,028%, sold to 28%, down to 28%, and closed at that price. The provision trade was light both for ruture delivery and cash. Compared with the closing Saturday, pork is 10c. The leading futures ranged as follows:

Sunday afternoon for disturbing the peace. He had gathered a crowd around him by his violent speeches, and so blocked the sidewalk that much annoyance was occasioned pedestrians.

This fellow's style is to commence an harrangue in a high voice invelghing against Christianity. The open-mouthed crowds that gather about him tickle his vanity and consuming desire for notoriety, and he becomes the more violent.

Some harmless brother who listens enters into a dispute with the crank, and before they get through, they have forgotten the gentle Example, and are often made to move on by some limbs of the law to keep them from fighting.

The fellow was discharged by the court and was very loud in his talk explaining the matter to a crowd of followers who met him in front of the station.

The Deserter Taken North.
William Kilgore, deserter from Co. K,
Fifth Artillery, of the Presidio of San
Francisco, recertly captured at Santa Monica by Constable Meyers, was taken north yesterday by Sergt. Edgar A. Marklin of the Fifth and an artilieryman. The ser-geant was very brief in his instructions,

geant was very brief in his instructions, and neither held conversation with the deserter.

"Any attempt to escape, Kilgore, and—you understand what. March." And they swung their revolvers within easy reach and marched him ahead down the long stone stairs, back on the way to a disgraceful court martial scene.

Disturbed the Peace.

A. W. Tilden got into a dispute on Spring street between Third and Fourth, with Arthur Rodgers and several others with Arthur Rodgers and several others Sunday evening and for his pains got a punch on the jaw that sent him crashing against a saloon door, smashing it open. Officer Matuszkiewicz gathered them both in for disturbing the peace, and yesterday they had a hearing before Justice Owens. Tilden was discharged, but Rodgers was found guilty and was committed for sen-

decrease of 275,000 bushels.

CARLISLE AS AN OPTIMIST.

Secretary Carlisle intimates that the nues for the current calendar year will exceed the necessary expen tures of the government by \$22,000, 000. It will be remembered in this ection that Mr. Carlisle estimated the deficit for the current year at some \$15,000,000, whereas it has ed \$45,000,000 during the past ax months and will doubtless amount to from \$70,000,000 to \$90,000,000 by the close of the fiscal year, on June 30.

The persistency with which the ad ministration insists that it has reve nue enough and to spare is in singu-lar contrast to the frantic efforts it is making to borrow more money. If the revenues were all-sufficient, as is claimed by Mr. Carlisle, there would be no need for the enormous bond issue asked for. A simple act by Congress, requiring the cancellation of demand notes, upon their redemp gold reserve in a short time. Another of \$50,000,000 at most should cer tainly suffice to meet the present emergency, with ample revenues and amount of cash now on

But Mr. Carlisle is altogether too optimistic. The surplus which he pro-fesses to see exists only in his own gination. This is where the shoo pinches, however much the admin-istration may seek to conceal the real

The people of the United States have about \$1,600,000,000 in the savings banks of the country. If the rovernment needs \$200,000,000, or \$500,000,000 or \$1,000,000,000, the peo ple will furnish it promptly by with drawing a portion of their savings from the banks and investing them in rnment bonds, provided they be given an opportunity to do so. And every man, woman and child who thus invested his or her savings would feel an increased interest in the well being of the government. Senator Sherman's suggestion of a popular loan en made as a key to the solution of the financial "predicament," assun ing that it is absolutely necessary for the government to borrow more the restoration of adequate impor duties would be a better remedy for existing ills; but of course Groven free-trade idol to permit that. Hence, let us have a popular loan.

When Republicans were at the helm of the ship of state, there was no deficit in the national revenues; there was no raid on the gold reserve; there was no necessity for refunding the greenbacks in interest-bearing bonds: re was no empty treasury; there was no lack of confidence, no finan-cial, commercial and industrial distress; no fat man of destiny in the executive chair; no nincompoop in the office of Secretary of State; no inchoate and incompetent statesmen in charge of important interests. Labor more generally employed than ever before, at better wages, and the country was prosperous. This era of prosperity will return when Republi-can principles again control the affairs of the nation.

Committees have been appointed in both branches of the Illinois Legislature to investigate the condition of the Lincoln monument at Springfield, which is reported to have fallen into a sad state of decay. It is proposed that the State shall take charge of

the monument, make the needed re pairs, and provide for the permanent care of the structure. This monu-ment is a patriotic one, and it is to be hoped that there is enough patriot-ism and State pride in the Illinois Legislature to carry out the plan in fitting manner. It would be a dis-grace to the entire nation if the grave of Lincoln were abandoned to decay But especially would such neglect be a disgrace to the State of Illinois within whose boundaries the remains of the martyred President are en tombed. Illinois has a sacred respon-sibility in this matter, which cannot norably be evaded.

The Committee on Labor of the Na tional House of Representatives has finally agreed on a compulsory arbi tration bill. In cases where the in terests of contestants are involved, it is usually customary for the framers of a legislative bill to consult both sides; but the House committee appears to have consulted only the rer esentatives of "organized labor," in framing the bill referred to, entirely gnoring the interests of the employer of labor. The fact that that unspeak able demagogue, Carroll D. Wright, indorses the bill just incubated, is enough to condemn it at the outset When will statesmen (so-called) learn to forego demagogy, practice justice and equity, be guided by common-sense, and keep fair play at least within gunshot?

Once in a while a Democratic organ still pipes in that "vicious Republican legislation" is responsible for the present "predicament" of the govern-ment. But most of the Democratic organs have abandoned such idiotic drivel, and have joined in the Macebeseeching the "vicious" Republicans in Congress to help pull the administration out of the Slough of De spond into which it is sinking deeper and deeper.

The members-elect of the Fiftyfourth Congress should study up the financial question, so as to be ready to bring forward some practicable measure of relief from the existing "predicament." The present in dications are that they will be called March to pull Mr. Cleveland and his confreres out of the hole they have got themselves into.

The San Francisco Chronicle de clares that "the valley railroad is as nearly certain to succeed as any enterprise ever undertaken in Califor true, and that Spreckels et al. ar acting in good faith. But there are some persons who will have a great deal more faith in the enterprise when the dirt begins to fly than they

The deficiency of revenue under the Gorman-Wilson tariff, since it went into effect some six months is in the close neighborhood of \$45. 000,000. Prof. Wilson declares that "there is a surplus in sight." there is every reason to believe that when Mr. Wilson's "surplus" materializes, it will prove to be only an other bond issue.

Chinese trickery doesn't go with the Japanese. The "peace commissioners" sent from China to the Japanese capital with no power to negotiate term of peace were promptly and properly nt home again. The heathen Chines is clearly outclassed by his more civilized adversary, whether in war or in diplomacy.

The battle is on between gold mono netallism and silver monometallism. It will not be settled at this session Cleveland is too firmly joined to his of Congress. Financial wisdom lies between these two extremes, but the extremists on either side are too much absorbed in their pet theories to rec-

Is it to be wondered at, when the government's expenses exceed its receipts by from \$7,000,000 to \$10,000,-000 per month, that it is necessary to borrow money to cause the female equine to progress?

Our Democratic friends call the resent tariff "a tariff for revenue"; but it is daily becoming more appar ent that a better name for it would be "a tariff for the prevention of rev-

The financial question is not in any sense a partisan issue. Some of the bitterest opponents of the President's plan of relief—or, rather, the plan which has received his latest indorse-

ment—are members of his own party. If his plans are defeated, as now seems certain, the defeat will be due to Mr. Cleveland's own party in Con-

ORPHEUM.—The mirth-provoking specialities in the new bill at the Orpheum will draw full houses. There is just enough in sober vein to give one a chance to catch breaths between laughs.

John P. Brace, of minstrel fame, starts the ball of fun rolling with his original sketch "All Night," in which he is ably supported by James McAvoy. Afbert Hawthorne was in excellent voice, and his songs "Monarch of the Woods" and "The Ship I Love" were so well readered as to receive a hearty encore.

Bogart and O'Brien are an exceptionally clever team of musicians, who play a variety of instruments well and do a lot of funny things that make their act go with a snap.

The same bill goes all week, with matmees Saturday and Sunday.

COMING ATTRACTIONS.—The Brownies are coming, sure. Their revels begin Thursday evening of this week at the Los Angeles Theater. It is predicted by those who have seen the dress rehearsal, under Miss Ailey's skillful direction, that it will be the finest children's performance ever given in this city. Weeks of careful training and minute attention to every detail will result in a perfect and artistic presentation. The girls will be attired as fairles, while the boys take the characters of Brownie land. Those who have heard the music of the operetta at rehearsals say the songs are some of the pretiest they ever heard. The fat little policeman, the dude with his cane, Uncle Sam, the poet, the sailor, the indian, and dozens of other well-known "Brownles" will make the stage look like a page from one of Palmer Scott's stories.

Silver filigree stars border the bottom and two rows of silver fringe further adorn the bottom of the front. Colored stones break the monotony of the silver bands on each side. The bodice is of velvet with a pleated vest finished with lace revers and silver stars, and the cut-out is bordered with a band of sable, a wider band breadth. The sleeves are also banded appearing beneath the fringe of the front with sable and have full lace epaulettes. Want Protection.

(San Diego Union:) Bankers of this city want State legislation to protect them against wildcat investment companies. The San Diego correspondent of the Los Angeles Times recently exposed one of these concerns which advertised itself as "a perfect profit machine," and, according to The Times, guaranteeing 27 per cent. per annum simple interest on money invested with it. Such pretensions are absurd on their face. Legitimate financiers deserve to be protected from such companies. Preposterous as the plans of such institutions appear to be, there are always inexperienced people to be caught by them, whenever any one offers to pay more than the market rate for money it is a proposition which should always have the closest scrutiny, and when a concern offers two or three times the market rate, the strong arm of the law should be invoked to control the management of financiering so extraordinary. It has given his prose a perfection which will carry it far down the shores of time. The letter sent during the last summer of his life to be read at the celebration of Bryant's birthday was a model of simplicity in the expression of feeling. It was brief, and at another time would have been written and revised in half a day; but in his enfeebled condition it was with the utmost difficulty that he could satisfy himself. He worked at it patiently day after day, until his labor became a pain; nevertheless, he continued, and won what he deserved—the applause of men practised in his art, who were there to listen and appreciate.

THE FIELD OF ELECTRICITY.

ELECTRIC LOCOMOTIVES COM ING INTO VOGUE.

Electricity in Irrigation — Ten ature of the Electric Arc—Fa in Electric Work — Tape

NEW YORK, Jan. 19, 1895.—(Spe RK, Jan. 19, 1830. (o) the an-.) Concurrently with the an-that the New York and New is to equip two of its branch electricity, appear the details ing motors. This locomotive is designed for heavy work, and will be called upon to handle trains as heavy as those now handled by heavy steam locomotives. A test of one of the completed trucks, representing one-half of the locomotive, was recently made upon the tracks of the Schenectady works of the construction company. In order to obtain the necessary load a New York Central heavy six-wheel engine was made use of, and the electric locomotive truck coupled to it. The machines were then sent in opposite directions and pulled at the connecting coupling as in a tug-of-war. The electric locomotive had a slight advantage over the steam engine in weight on the driving wheels, and pulled it up and down the track with apparent ease. For the same weight upon the drivers it was shown that the electric locomotive will start a greater load than the steam locomotive, the pull being constant throughout of entire revolution of the wheel, the difficulty of variation of pull with the angle crank as in the steam locomotive being eliminated. The test also proved that not only were the motors sufficiently powerful, but that the driving mechanism and armature couplings are amply strong to transmit the torque of the armature to the axle.

ELECTRICITY IN IRRIGATION.

In a few places artesian wells are utilized to run electric light plants, and it has now been suggested that a reversal of the idea might be useful in establishing motor plants to operafe pumps by means of which water could be widely distributed in arid regions. A 600-foot well can be sunk for \$1500. It takes 27,154 gallons of water to cover an acre one inch deep. A 15-horse power motor will pump 750 gallons per minute and raise the water 50 feet. Seven hundred and fifty gallons will cover 40 acres 1 inch deep every 24 hours, or 280 acres every week. One well will furnish water during the irrigation season, In a few places artesian wells are utilacres every week. One well will include water during the irrigation season, from May 1 to August 31, to cover 280 acres 17 inches deep. This is an abundance for almost any crop, and a great deal more than most crops require. The most convenient, as the power comes to it by wire from the central station or powerby wire from the central station or powerhouse. One thousand horse power will run 56 15-horse power motors, and will allow 15 per cent. loss for transmission of power from dynamos to motor. The lines for transmission, including poles, wires, etc., would cost from \$8000 to \$10,000. Thus 1000 horse power would furnish an abundance of water for 56 times 280 acres, or 15,688 acres, about 24½ sections, at a cost, not including ditches and reservoirs, of about \$160,000, a very little over \$10 per acre. The total operating expense is estimated at about \$1 per acre for the season. Where lighting plants or trolley roads are running, it should be easy to get the power current for the motor.

THE TEMPERATURE OF THE ELECTRIC ARC.

TRIC ARC.

the nature of its phenomena is still far from being known or understood. In a communication recently made by M. Violle to the French Academic des Sciences, incommunication recently made by M. Violle to the French Academie des Sciences, interesting evidence was adduced to show that the temperature of the arc increased with the current. Photographs of the crater of the carbon, on which the little oval of white light appears to stand, showed that its intrinsio brilliancy was the same with 1000 or 1200 amperes as with ten amperes. Examining the spectra of, the arc and of the positive carbon, M. Violle found a large number of the bands of the spectrum of the arc. stood, out brilliantly against the continuous spectrum of the crater; they were, however, unsteady and varied in brightness, being brighter the greater the current. It is doubtful whether the brilliancy of the bright bands forming the spectrum of a gas is related to its temperature in the same way as are the corresponding portions of the continuous spectrum of a solid body. The doubt is increased when the gas is illuminated under the action of electricity, which seems capable of converting itself into light without heat. On the other hand, if the arc behaves the a conductor carrying a current it must be the seat of an evolution of heat proportional to the energy consumed, so that its temperature should incurrent it must be the seat of an evolution of heat proportional to the energy consumed, so that its temperature should increase with the current. In any case the cause which limits the temperature of the crater does not apply to the arc. M. Violle tried to determine the temperature of the arc by introducing into it a thin rod of carbon. A carbon rod introduced into the arc produced between two poles of the same metal burns away differently with different metals, slowly with copper, quickly with zinc; showing, however, a much higher temperature than that of the volatilization point of zinc. M. Violle concludes that the temperature of the arc is, generally speaking, higher than that of the positive carbon, and that it increases with the energy consumed.

FADS IN ELECTRIC WORK.

Dr. Louis Bell has lately remarked on

FADS IN ELECTRIC WORK.

Dr. Louis Bell has lately remarked on the fads that prevail in electrical industry, and on the rise and fall of various notions. It is a fact that some of the dynamos and motors best known owe their widespread use rather to the arts of brilliant salesmen than to any intrinsic merit; and so it runs all along the line. Any electric-light man of a few years' experience can cast a critical eye on his plant, or the plant of his neighbor, and perceive how almost every year there is a special fashion in the brands of wire that are most popular. One will come up in the market, backed by half-a-dozen choice expert tests, and for a year or two will be given a right royal welcome by station managers. Then another brand, quite the proper thing in installation, will show up and have its turn in popular favor. There are now on the market a large number of kinds of most excellence and reputation are not the slightest bar to some peculiar make being taken up as a fad, and for a season or two holding sway over the hearist of wiremen. Insulated wire, perhaps, sees more novelties than anything else, but it is worth noting that some remain popular and useful that were employed by Morse and other ploneers nearly half a century ago.

MAGNETISM AND GERMINATION.

The experiments on the effects of electricity and magnituments.

MAGNETISM AND GERMINATION.

The experiments on the effects of electricity and magnetism on plants continue from time to time. The latest are those of Tolomel, who has tried the effects of magnetism on the germination of Phaseolus vulgaris. He found that a magnetic field of feeble intensity had no appreciable effect on the germination of the seeds; while a field of great intensity caused more or less increased rapidity of growth in proportion to the proximity of the growing seeds to the point of greatest magnetic intensity. Young plants were found to be diamagnetic, or resistant. The trouble with these reports often is that the means used and effects obtained are often stated in very general terms, the botanists and others not being familiar with the agency they use. Dectors using electricity in their practice were equally vague and ill-informed until recently, and an English electrical journal remarks that

it is said that there is little bope for the present of uniting, telephonically, the cities of Paris, Berlin, St. Petersburg, and other important centers. The Germans are progressive in this respect, however, and have just put up four silicon bronze telephone-wires between Berlin and Vionna, a distance of 409 miles. There is a longer line—406 miles—between Berlin and Konigsberg; and the German administration expects to build a 682-mile line from Bodenbach to Trieste, while it has also been experimenting between Berlin and Trieste, a distance longer than any, namely, 725 miles.

STREET-CARS RUN BY CITY REFUSE.

STREET-CARS RUN BY CITY REFUSE.

An ingenious and, perhaps, practicable plan has been unfolded by A. H. Gibbings for the electrical utilization of city refuse in operating storage battery cars. He says that in the English scaport town of Hull about two hundred and fifty tons of miscellaneous refuse are destroyed weekly. This is a small quantity compared with that of other provincial towns. A large portion is composed of dry shop refuse, such as paper, straw, wood and ashes, while it is not an infrequent occurrence to have to destroy whole ship cargoes of condemned fruits, vegetables and fish. From observations taken he onsiders himself well within the mark in estimating that with the necessary alterations to the present destructor he could obtain a continuous power of 45 indicated horse power. This 45 indicated horse power, at an efficiency of electrical machinery of only 90 per cent., or a continuous output of 400 amperes at 75 volts. This arrangement would be amply sufficient to charge batteries of twenty-five cells, always keeping a certain number of batteries in parellel, according to the rate of charge. Of course the number of batteries and their size would depend upon the size of car to be propelled. The power at the destructor station can be supplied continuously for twenty-four hours. This would be equivalent to doubling the capacity of the plant, as the batteries charged during the night would meet the requirements of the tramears for half the succeeding day. This power would charge a sufficient number of accumulators to rim from about one-half to three-quarters of the trams, according to whether the service consisted of twelve or more trams in the hour on the different routes. The remaining portion could be conveniently and economically provided for by supplying another station with power from the machines at the central electric-lighting station, which machines would be

TAPE BY THE MILE.

At first blush it would not seem likely that electricians would have much use for tape, but as a matter of fact they employ it literally by the ton, especially of late years. The electrical circuits are of wire, and every time a joint is made it is served with tape, or should be, the tape being nearly an inch broad and well impregnated with insulating material to keep the current in and the molsture out. Sometimes, if one looks up at wires in the street, stray ends of loose tape can be seen fluttering in the breeze, like rags from a sore finger. A great deal of electrical machinery is wound up with tape to prevent burn-outs, and the street-railway companies are wisely fond of liberally way. It would, in short, be difficult to find a modern department of electrical work in which tape is not an indispensable and ready means for helping to maintain the integrity and efficiency of the circuits. The Bight of Aliens to Hold Lands in

California. of The Times:) Mr. Gottschalk does well in calling attention in his letter, published in this morning's Times, to the unfortunate effect of the adoption last November of the constitutional amendment dealing with the tenure of land in this State by with the tenure of land in this State by aliens. What the real motive which inspired the amendment was, it is difficult to see. The Legislature has had full power, ever since the admission of Callfornia into the Union, to limit or prohibit the acquisition or holding of land in this State by non-resident aliens. Instead of exercising this power it has expressly enacted that "Any person, whether citizen or alien, may take, hold and dispose of property, real or personal, within the State." Husting this liberality only citizen or alien, may take, hold and dispose of property, real or personal, within this State," Hmiting this liberality only by the provision that in case of property passing on death, where there is no will, the successor must appear and claim his succession within five years. It might naturally have been supposed that, before the Legislature would seek power to prohibit the acquisition or holding of land by resident aliens, it would have exercised the power it already had by limiting the rights of non-residents. The Legislature took a different view of the proper coder of events, however, and now has power to forbid aliens, whether resident or non-resident, from sequiring and holding lands in California.

The knowledge that this is the case must necesarily tend to discourage aliens, though they be residents, from investing their capital here on mortgage of real estate, as, before the time comes for forciosure, the Legislature may have acted on its newly acquired power; and it may be impossible for the mortgage to buy in the property without having recourse to some of those subterfuges which always follow in the wake of this class of illiberal, restrictive legislation. By discouraging the investment of capital, the rates of interest on loans are raised and the poor, in need of cheap money, are oppressed.

The sooner the Legislature declares its

rates of interest on loans are raised and the poor, in need of cheap money, are oppressed.

The sooner the Legislature declares its intention on this subject the better for the people.

The fact that the amendment was submitted by the last Legislature to the people, and has been approved, would indicate an intention to make some change in the law, and a felling of uncertainty and mistrust is always to be avoided if possible, especially in financial matters.

certainty and mistrust is always to be avoided if possible, especially in financial matters.

At the same time, resident aliens, desirous of investing in the purchase of real estate, need not, I think, be frightened by the adoption of the amendment in question. As I said before, the amendment only puts resident aliens in the position in which non-resident aliens have been since 1849. The section dealing with this matter, in the Constitution of 1849, is as follows:

"Sec. 17. Foreigners who are or may hereafter become bone fide residents of this State, shall enjoy the same rights in respect to the possession, enjoyment and inheritance of property as native-born citizens."

The section in the Constitution of 1879, before the adoption of the recent amendment, read:

"Sec. 17. Foreigners of the white race or of African descent, eligible to become citizens of the United States under the naturalization laws thereof, while bona fide residents of this State, shall have the same rights in respect to the acquisition, possession, enjoyment, transmission and inheritance of property as native-born citizens."

(Memphis Avalanche:) A careful survey of all the forms of government that inflict the people goes to show that government nowadays exists for the purpose of enriching office-holders and providing people with place rather than to protect life and property. And we pay like smoke for this decidedly elaborate luxury.

PLEASANT RECEPTION.

PLEASANT RECEPTION.

Dr. and Mrs. S. O. Thomson gave a pleasant reception on the evening of January 26, at their residence at University, in honor of their son Archibald Percival's twentw-first birthday. The drawing rooms were handsomely decorated with banks of ferns, and bouquets of carnations, narcissus, and sofrano rosebuds.

The dining-room was a bower of artistic beauty.

Some very good advice was given to Mr. Thomson by Gen. Ben P. Runkle, to which he replied in a modest and fitting manner.

About eighty guests were present. Miss Whitehorn sang two beautiful solos, and Miss Bovard and Miss Johns rendered several fine pieces of instrumental music. Among those present were: Gen. and Mrs. Ben P. Runkle, Judge and Mrs. Lucien Shaw, Mr. and Mrs. N. P. Conrey, Dr. and Mrs. M. E. Phillips, Rev. and Mrs. A. C. Williams, Dr. and Mrs. J. F. T. Unknown Man Killed.

On the Southern Pacific road a light engine was running yesterday about three miles east of Paim Springs, when suddenly a man appeared on the track. His appearance in front of the train was so sudden that Engineer Ritter had no time to stop the engine, and, as a consequence, the poor fellow, whoever he was, was killed.

NEW DRESS GOODS AND SILKS TODAY. More than a thousand articles were added to the bargain counter yesterday; they are on sale this morning at bargain prices; have you seen the grab-bag? 1 cent a grab; a lot of odds and ends dumped into one big tray; your choice 1 cent. Face powders, chamois feather dusters, combs and brushes of all kinds, perfumery and toilet articles-all at bargain prices; that means about one-half the original price. There is a big crowd at all hours of the day at the big bargain counter; embroideries and laces, remnants of muslin—all going, and going fast at bargain prices. Collars 1 cent; linen collars 1 cent; fancy fringes at half price; muslin underwear at a big reduction from the regular price. The prices are going down, down, down. The goeds are going out in the same proportion as the prices are reduced. We will have a silk bargain for you in a few days; it will be a hummer; watch for it. We will have a dress-goods bargain for you in a few days; watch for it. There never was a time when you could buy goods as cheap as you can buy them today. The bargain counter is, in every sense of the word, a bargain counter; we are constantly improving the qualities on the bargain counter; new goods every day. Our new cases are now in, and the trade will from this time forward show great improvements. More new capes today in the big cloakroom; all our last season's stock is being closed at a big reduction; all the winter weights are being sold for a reduction that will insure a speedy sale. Today the bargain-counter ladies will find a small line of silk stocking supporters for 10c a pair; also a new line of good cotton web supporters for 10c; the regular price is from 20 to 35c; there will not be a pair of the silk supporters one hour after opening; try and get in early. We buy anything so the price is right for the bargain counter; whether the quantity is large or small, it is the same; this line is a small one; it is a good one as well. ENGINEER'S REPORT.

The City Engineer reported:
"In the matter of the protest of N. P. Leighton and others against the grading of Ocean View avenue between Burling ton avenue and Bonnie Brae street, I find ton avenue and Bonnie Brae street, I nno, upon examination, that the total frontage affected is 797 feet, a majority of which would be 399 feet. The protest represents 484 feet. The protestants have, therefore, a majority." Proceedings abandoned. "In the matter of the petition of the First Improvement Company and others, in reference to a change of grade on Grand avenue between First and Courthouse streets. I present an ordinance of in-

on Grand avenue between First and Courthouse streets, I present an ordinance of intention to change and establish the grade on a grade practically the one asked for, and fixing the district affected by the proposed change. The grade suggested by the ordinance would be an improvement over the one now established, but will still necessitate draining the street across private property. The petition asking for this change represents a majority of the frontage on the street between the points to be changed, therefore giving your body jurisdiction in the matter." The ordinance was adopted.

changed, therefore giving your body jurisdiction in the matter." The ordinance was adopted.

"In the matter of the petition of W. S. de Van and others, asking that Grand avenue between Temple and Courthouse streets be regraded, I find that no change has been made in the grades of said street to conform with the wishes of said street to conform with the wishes of said petitioners and I would recommend the accompanying ordinance of intention to change and establish said grade between said points be adopted, as the petitioners represent a majority of the frontage, and the grade as suggested by their ordinance is as near as is practical to comply with the wishes of all the petitioners." Temporarily laid over. "In the matter of the protest of John F. Humphreys and others against the laying of sewers in that portion of the Alameda-street sewer district, No. 2, which lies east of Center street, I find that the protest represents a majority of the frontage of that portion of the district referred to, but which is only a small portion of the entire sewer district. The portion of the district saking to be included is sparsely settled and is what was once the old river bed." Referred to the Sewer Committee.
"Upon petition of C. Raphael and the instructions of your body I present ordinance of intention to construct a sewer on San Fernando street to within twenty-five feet of the Downey avenue bridge." Adopted.

"Ordinance of intention to construct sement sidewalks on Third street be-ween Olive street and Grand avenue."

This change would give the relief asked for." Adopted.

"In examining the profile of section No. 3 of the outfall sewer and the method by which sewage has been diverted for irrigation purposes I find that the custom has been to close the valve at the lower end of the syphon, thus subjecting the whole length of the wood stave pipe to a pressure varying from practically susting at the settling chamber to about forty feet head at the lowest point. It has occurred to me that if a shut-off valve is placed just below the first opening west-of Rose-dale avenue all necessary water for irrigation could be diverted without subjecting the long line of pipe west of the proposed gate to such unnecessary strain. I ing the long line of pipe west of the proposed gate to such unnecessary strain. I would, therefore, recommend that a Ludlow flume gate be purchased and placed at the point suggested. The gate proposed can be laid down in Los Angeles at a cost not to exceed \$300, and I think it could be put in place at a cost not to exceed \$100 additional, including the necessary standple, or air valve that must be placed just west of the gate." Referred to the Sewer Committee.

Then the poor heathen was compelled to lie in jail about a week, reain an attorney and suffer generally, only to be discharged on account of the non-appearance of the fellow as previously related.

This M. M. Sims is a butcher, at the corner of Third street and Wolfskild avenue, but he is consumed with a burning desire to win glory as the hero of some 10-cent "Nick Carter" or "Old Sleuth" tale, and, in furtherance of this object, lifew in several dollars to become a detective. Yesterday he got drung and went wandering down into Alameda street. There he engaged a woman in conversation through her window, and in a moment they were abusing each other with unmentionable epithets, and the man placed his hand dramatically on the handle of his pocket gun and threatened her with arrest.

placed his hand dynamatically on the handle of his pocket gun and threatened her with arrest.

But Officer Blackburn prevented further compilications by seizing the gun (for he had no permit) and sending him up to the station. By the time the chopfallen "detective" had been half through the police court process, and had listened to Justice Owems's corrective sentences, he was in such a state of "blue funk" that he begged heartily for lenhency. He tord of his temperance and morality, his waiting wife and the hard times in such tones that His Honor het the fellow off on a light \$5 fine, which he paid. The fellow whis drunk, carrying a concealed weapon and disturbing the peace, not only by quarroling, but by being loose with his revolver. Before this the fellow has assumed the rights of an officer, and has been making himself generally offensive.

If some one does not suppress him as a matter of charity, one of these days he will be broken in two for meddling around, and that will be the last of "Sims, detective."

EVANGELIST BOSS.

His sermon was characteristic, full of force and power.

His text was Galatians ii, 3, "Having begun in the spirit are ye now made perfect in the flesh?" "Ware you converted by works or faith?" asked the speaker.

"You answer by faith, then why do you expect to be sanctified by works? Any other theory of sanctification but by faith in Christ's blood is blasphemous.

"Men say. 'I believe we grow in grace, and grow the carnality out of our hearts gradually.' Nature will give that theory the lie. Suppose I plant corn in a field and weeds and grass grow up. I say go and plow and hoe the weeds out by the roots; you say no, don't raise a disturbance in that way, let the corn alone as it is, and it will grow the weeds out.

"Suppose you try the plan of plowing them out in one-half the field, and growing them out in the other half, which half will have the best crop of corn?

"Another man says we are not sanctified till we die. If death does it, wad don't need Christ. If death does it, wad on't need Christ. If death does it, wad on't need Christ. If death does it, wan offication is not needed in this life, but only in the-next.

"A Presbyterian preacher once told his wife, who was seeking hollness, that she could not be sanctified until she died. She took sick, the doctor said she must die. She sent for her husband to pray for her sanctification. He did and she was sanctified and got well and lived for years, thus destroying his theory.

"Others say we are sanctified when converted. Then why don't you live it, and not be getting mad. Why don't you call up sinners to the altar to be sanctified, you never do. I will give \$50 for any case of sanctification offered to a sinner in the Bible.

"The only true theory is we are sanctified by Christ's blood, on the exercise of faith, after a full consecration of all to Him, and it is attainable in this life, and now, if you will meet the conditions."

At 'the close of the sermon about twenty persons asked to receive the blessing. Many went to the altar and received the assurance

Food Makes the Man.

Food Makes the Man.

(Journal of Household Economics:)
Food is force. As a rule, few people know
how to eat. They fail to realize that
the quality of all mental action is determined by the quality of food. Lack of
energy and buoyancy of spirit is often
as fatal to good work as an illiness itself,
and there is no question but that hygienic cooking produces directly one or
the other. There is such a thing as "a
cooking menu"—the scientific solving of
the problem. The universal temperance
reform will begin when good cooking becomes the rule rather than the exception in every household. The extra elaboration of pastry should give way to
excellence in the preparation of simple
foods, of steak perfectly broiled, good
bread, a realization of the value of fruit,
and of tea and coffee made in a way
that retains their flavor and stimulus.
With hygienic food, reasonably early
hours of sleep, and an intimate acquaintance with fresh sir, a clearness and
vigor of mind can be constantly had that
will act on affairs with successful energy.

An exchange tells the following: "The meanest man on record lives in Union county, Mo. He sold his son-in-law one-half of a cow, and then refused to divide the milk, maintaining that he sold only the front half. The son-in-law was also, required to provide the feed the cow consumed, and compelled to carry her water three times a day. Recently the cow hooked the old man, and now he is suing his son-in-law for damages."

Alexander Dumas says he has outlived the taste for most things that more an procure. The chief pleasure of his life new is meditation, which he indulges by taking long walks in the forests of Marly. M. Dumas is now a white-haired old man, but his old age is vigorous. He lives with his howalld wife at his country place, near Marly, on the \$100,000 or so realized by the sale of his collection of pictures last year.

LINCOLN AND GRANT.

OPPOSITION TO THE GRADE OF LIEUTENANT-GENERAL.

The Only Thing that Made it Possi ble Was Dissatisfaction with Halleck—Lionizing Grant at Washington.

The iss interesting to call to mind some of the forces which made Grant the general-in-chief of the armies of the United Stabes, and some of the incidents that attended the consummation of that historic work. It was by no means a grateful task for the Comgressmen of that time to lend a hand in creating the grade of lieutenant-general in the army, although there was no question as to the man on whom that distinction should be conferred. I question very much if the bill to revire the grade of lieutenant-general would have gone through Congress then if it had not been for the very general dissatisfaction with Gen. Halleck, who was acting as general-in-chief, with headquarters at Washington. This dissatisfaction was constantly increasing, and, although the country at large did not seem to be very keenly alive to Halleck's frade-quacy to the situation, Washington, and especially the chamber of Congress, reacting and his unwillingness to take responsibilities, and his supposed incapacity to grasp the whole military situation. I doubt if the most outspoken and malignant Copperhead in Congress was so disliked, so railed against, and so revited by the more radical members as this unfortunate general-in-chief.

The belief that some new man, no matter who he might be, could vigorously

peace if he were in Halleck's place, made possible the passage of the bill reviving the rank of lieutenant-general of the army. Oddly enough, men who complained that the President still clung tenaciously to Gen. Halleck as his military adviser, never doubted for a moment that Mr. Lincoln was more than willing that the rank should be revived with the distinct understanding that Grant should be the wearer of the title, and by virtue thereof become at once the generalissimo of ali the military forces of the United States. That the President did cling to Halleck, in spite of the very general popular disfavor with which the general was regarded, is well known. When I ventured, one day, to say to the President that Halleck was disliked because many people supposed that he was too timid and hesitating in his military conduct, Mr. Lincoln's face at once wore a sober, almost severe expression as he said that he was Halleck's friend because nobody else was. Other men had received from the President a somewhat similar impression; and, whatever may have been thought of the very remote possibility that any other man than Gen. Grant would be called to the head of the armies, Congressmen who were clamerous for a more vigorous prosecution of the war were eagerly turn-

very remote possibility that any other man than Gen. Grant would be called to the head of the armies, Congressmen who were clamorous for a more vigorous prosecution of the war were eagerly turning to the "lieutenant-general bill," as it was called, as the readlest way to be rid of Gen. Halleck's alleged slowness.

If there was any doubt as to the popularity of Grant in Washington (and he was disposed to regard that city as a place of snares,) the arrival of the newly-created lleutenant-general effectually dissipated it. He had been called to the capital, and had arrived there late in the afternoon of March 8, 1864.

That evening, as it chanced, was the occasion of the usual weekly reception at the White House, and thither Gen. Grant went by special invitation. Thither, too, went throngs of people when it was known that he would be on view with the President. So great was the crowd, and so wild the rush to get near the general, that he was obliged at last to mount a sofa, where he could be seen, and where he was secure, at least for a time, from the madness of the multitude. Women were caught up and whirled in the torrent which swept through the great east room. Ladles suffered dire disaster in the crush and confusion; their laces were torn and crimelines mashed, and people got upon sofas, chairs and tables to be out of harm's way or to get a better view of the spectacle.

It was the only real mob I ever saw in the White House. It was an indescribable scene of curiosity, joy and pleasure. For once, at least, the President of the United States was not the chief figure. The littie, scared-looking man who stood on a crimson-covered sofa was the idol of the hour. He remained on view for a short time; then he was quietly smuggled out by friendly hends, and next day he departed from the city, which he then appeared to dread so much, to begin the last and mightlest chapter in his military cares.

WHISKY TRUST.

ENHUT HAS BEEN OUSTED AS RECEIVER.

It is Said that the Stockholders Will Now Proceed to Immediately Reorganize the Company on New Lines

CHICAGO, Feb. 4.—Judge Grossoup te-day dusted J. B. Greenhut from the re-ceivership of the Whisky Trust. He al-lowed Receiver Lawrence to remain as rep-resentative of the directors, and appointed Gen. John McNuft receiver-in-chief. John J. Mitchell was appointed another receiver to represent the New York stockholders.

Gen. John MoNuit receiver-in-chief. John J. Mitchell was appointed another receiver to represent the New York stockholders. The decision accompanying the order was long, and criticised Greenhut's actions. Judge Grosscup's decision was slengthy and somewhat sensational. After an exhaustive review of the case, he declared that the court had been imposed upon in the selection of President Greenhut, as one of the receivers. A receiver's duty, he said, should be the enhancing of the value of the property which he is to control. Admissions in court had shown that Mr. Greenhut was heavily short on the stock, and that, accordingly, his personal interest would dictate the depreciation of stock rather than the enhancement of its value. By admissions of counsel, the court said, it was shown that the property interest in the original application for a receiver for the company. The evidence showed, Judge Grosscup said, that a vast portion of the stock was held by New York stock brokers for speculative purposes. He could not exactly approved calling in a United States court as referce, but as it was evident that the referce was needed, and as he had, been applied to, he would act. He again denounced the selection of President Greenhut as receiver as an imposition on the court, and closed with the curt statement "that for these and for other sufficient reasons, Mr. Greenhut is removed from the receivership."

easons, Mr. Greenatt is reinforce from the ecocivership."

In an interview, Levy Mayer, one of the attorneys for the Stockholders' Committee, said: "The stockholders will now orroceed to the immediate reorganization of the company, and when that is perceived they will, of course, be in a position to take the property out of the hands of the receivers. In the meantime it will, be necessary to have a thorough investigation of the books of the company, and o ascertain just how the insiders, particularly Messrs. Morris and Greenhut, have conducted its affairs."

NO ULTIMATUM YET. Mexico Will Perhaps Issue it by

associated Press Leased-wire Service.
CITY OF MEXICO, Feb. 4.—In spite of the many announcements that today was imbroglio, nothing has transpired up to this evening, and a statement of policy is not looked for now till tomorrow. A labor demonstration was held this morning and some 10,000 men with bands and banners marched to the palace and, calling on President Diaz, tendered their services to the President in case of war with Central America. There is no di-mirution in the enthusiasm of the populace for upholding what are considered Mexico's righteous demands.

Itwing explanation of the Chinese peace commissioners:
"At the meeting of the pienipotentiaries of the Japaness and Chinese on the 22d, Count Ito, in an address to the Chinese Discipotentiaries, pointed out to them the defectiveness and insufficiency of their powers. He gave them positive assurances; however, that whenever China manifested a serious desire for peace by confiding actual and full powers to Chinese officials of such a nature and scepe as would render it certain that the terms which might be agreed upon would be confirmed by the Chinese government and would actually be carried out in good faith, Japan would be prepared to enter upon new negotiations."

Associated Press Lessed-wire Service.
YOKOHAMA, Feb, 4.—(By Asiatic Cable.) The following naval report of the fighting about Wei-Hat-Wei has just been received here. It says:
"The forts about Pai-Chi-Hyaso were taken during the morning of January 30, Wednesday last. The naval land force at once occupied Chiaopell and bombarded Tatao Island. The enemy's ships and the forts on Kung-Liu-Chiu Islands replied and three or four sailors were killed. and three or four salors were killed. Our ships are still outside the lorts. The foreign ships are observing the movements about Wel-Hai-Wel.

ATTEMPTED RECAPTURE. ATTEMPTED RECAPTURE.

LONDON, Feb. 4.—A dispatch to the Times from Tien-Tsin says Admiral Ting, commander of the Chinese fleet at Wei-Hai-Wei, landed 2000 men on Wednesday last and made an attempt to fecapture the southern forts from the Japanese. The attempt was finally abandoned and the Chinese re-embarked. Admarial Ting, who was held by Viceroy Liu Kun Yieh to be partly responsible for the fall of Port Arthur, and whose case was submitted to the board of punishment for action, was active in the abore defense of Wei-Hai-Wei. His conduct at the latter place has met with commendation. The Chinese military commanders are at variance.

THE CUP DEFENDER.

BRISTOL (R. I.,) Feb. 4.—The Hereshoffs have hired a large-number of extramen and work on the new cup defender will now be begun in earnest. About sixty tons of lead in pigs came in by rail from New York. This was carted to the works and placed in the yards to be south of the works, where it will be near the big melting pots. Besides this sixty tons, there are about thirty tons on hand available for the keel of the new cup defender. That the new boat will be a keel boat able for the keel of the new cup defender. That the new boat will be a keel boat there is but little doubt, and what goes to strengthen this fact is that the work of making a mold for the lead keel or outside ballast, is now in progress.

There is quite a quantity of angle iron on hand, and in the boiler shops the men are getting some of it in readiness to put on the tables and bend it to position.

Dead Sea Drying Up.

Dead Sea Drying Up.

The Dead Sea of today is a little body of sluggish, dark, greasy water gathered at the bottom of the deepest depression on the earth's surface, a hollow 1300 feet below the level of the Mediterranean. A recent scientific explanation has proven, however, that at one time its surface was on e, level with that of the Mediterranean, and its area more than twenty times what it is at present. In what the geologists call the "glacial period" the Jordan was an arm of the Dead Sea and was more than 1000 feet in depth.

A NUN AND HER VOWS.

MARION CRAWFORD'S HEROINE IN HIS ITALIAN STORY.

She Laughed at Eternal Punishment but Earthly Shame and the Honor of Her House Held Her Back.

Marion Crawford's latest story, "Casa Braccio," now running in the Century, contains some of his most dramatic writ-ing. The hero, a Scotch physician named Dairyniple, has fallen in love with Sister Maria Addolorata, the inmate of a con-vent at Sublaco. She has promised to elope with Dairymple, and her mental struggle is thus portrayed in the Pebruary

struggle is thus portray seem in umber:

"Maria Addolorata leaned against the deorpost and looked out, her hand white in the shadow against the dark wood, her face whiter still. But on her hands there were two marks, visible even in the diminess. They would have been red in the day, and the place hurt her from time to time, for she had bitten it savagely. It was her pledge, and the pain of it reminded her of what she had promised to do.

It was her pledge, and the pain of it reminded her of what she had promised to do.

"She needed the reminder; for, now that he was not near her, the enormous crime stood out, black and lofty as death itself. It was different when Dairymple was at her side. His violent vitality dragged hers into action; dragged, drove it, and goaded it, as unwilling soldiers have been driven into battle in barbarous armies. Then the fatality seemed irresistible, then the dangers seemed small, and the burning red shame was pale and weak. Those bony young hands of his had strength in them for two, his gleaming eyes burned out the resistance in hers, and lighted them with their own glow.

"The hearty recklessness of his unbelief drove through and through her composite faith, and riddled it with loopholes for her soul's escape. Then the reality of her passion made her nobler love mad to be free and to break through the solid walls in which it had been born and had grown too strong. When his love was there, hers matched itself with his, to smite fortune in the face, to dare and outdare heaven and hell for love's sake; with him the bursting blood made iron of her band, tingling to buffet coward fate's pale mouth. Then she was strong above woman; hen she was brave as brave men; then, having promised, to keep was but the natural hold of will—to die was but to dare one little adversary more.
"But she was alone now, and thinking, as

was brave as brave heart and promised, to keep was but the natural hold of will—to die was but to dare one little adversary more.

"But she was slowe mow, and thinking, as she looked out irbo the tragic night, and watched the blackness of the menumental clouds. She did not return to her former self, as some women do when the goad leaves the heart in peace for a moment. She did not say to herself that she would order the convent gate to be shut on Angus. Dalrymple forever, and herself to go back to the close choir, to sit in her seat among the rest, and sing holy songs with the others, restfully unhappy, as many of them were. She knew far too well how strongly her heart could beat and how icy cold her hands could grow when love was neith her. Yet she shuddered with horror at what she had promised to do. She would struggle to the last, but she must, yield when she heard his voice, and felt his hand at the very last moment, when they should be at the garden gate, he drawing her on, she looking back. "It was portury and sacrilege, and earthly shame, and eternal damnation. Nothing less. And the words had full and deadly meaning to her. It mattered little that he should think differently, being of another faith, or rather of no faith et all. It was all true to her. It was not risk; it was certainty. What forgiveness had earth or heaven for a faithless nun. He talked of marriage, and he would marry her according to a rite that had a meaning in his eyes. Heaven would not divorce the sworn and plighted spouse of Christ to be the earthly wife of Angus Dalrymple.

"Visions of eternal torment rose in her wind a tangible ssaring hell, allye with

Dalrympie.

"Visions of eternal torment rose in her mind, a tangible searing hell, alive with farme and devils, a sea of liquid fire, an ocean of bolling pitch, Satan.commanding in the midst, and a myriad of fiends working his tormenting will.

"Her pale lips curied scornfully "in the dark. Those were not the terrors that frightened her, nor the horrors from which she shrank. There was a question that was not to be answered by her own soul in damnation or salvation, but by the lips of men hereafter—the question of the honor of her name. The traditions of the good old barons were not dead in that day, nor are they all dead yet. Many a Braccio had done evil deeds is his or her day, and one, at least, had evil deeds to do after Maria Addolorata had been laid in her grave.

do after Maria Addolorata had been laid in her grave.

"But sin was one thing, and dishonor was quite another, even in the eyes of the nun of Sublaco. For her sins she could and must answer with the weal or woe of her own soul. But her dishonor would be upon her father and her mother, and upon all her race. Nor was there any dishonor deeper, more deadly, or more lasting than that brought uson a stainless name by a fathless nun. Maria Bracelo hesitated at disgrace, while Maria Addolorata smiled at perdition. It was not the first time that honor had taken God's part against the devil in the history of

part against the devil in the history of her family.

"That was the great obstacle of all, and she knew it now. Dalrymple might promise her honor and respect, and the affection of his own father and mother for the love of her parents, a home, respected wifehood, and all the rest. With his strength, he might impose her upon his should dictate, for he was a strong and dominant man. But in their hearts, Protestants, English people, foreigners as they were to her race, even they could not tell themselves honestly that it was not a shameful thing to break such vow as hers, shameful and nothing less. And if, for a moment, he were not there to hold them in his check, she should see it in their faces, and she must hang her head, for she could have nothing to answer. For him she must not only sacrifice her soul, wrench out her faith, break her promise to God, and her vows to the church; she must give herself to public earthly shame for his sake.

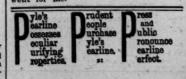

"It was too much. She could_bear anything but that. Rather than endure that, it was better to die."

Why the Price Went Up. Why the Price Went Up.

(Harrison's Magazine:) A dry goods merchant, observing a junior assistant disputing with a customer about the price of some silk she wished to purchase, stepped up to the combatants, and, after a wordy tussle, succeeded in obtaining a higher price for twenty yards than the goods were marked. His method of persuasion was based on the statement that, owing to the disease among silkworms, prices were rapidly advancing. He then administered a homily to the assistant on the necessity of using bis brains and exercising ingenuity in making sales.

The next day the same merchant had to rescue the same assistant from the clutches of an old lady, who was belaboring him with her "girgham."

"What did you say to incense her?"

The resolution ordering the advertisement for the sale of a franchise for an
electric light, heat and power company, as
applied for last week by Ed R. Braley
and advocated by his attorney, James McLachlan, Eng., was read. When President
Cox inviked remarks on the subject from
offizens in the jobby, Frank Lowe, representing the Banning Company, made a
verbal protest against granting the franchise, if the power-house is to be located
in the block which has been muned as the
probable site. J. S. Torrance also protested, on the grounds that he and Mr.
McGilwray are about to put up a large
building in that block, and the proposed
ower-house would be a nuisance. He said
his protest was purely a personal one, and
he was not acting for the electric company, in which he is interested. James
McLachian, Esq., said that the question
of location of the power-house had not
been determined by his clients. He intinated that the board has nothing to say
about the location of the power-house as a
nuisance, they will have recourse in law.
Trustee Weed suggested that the resolution and franchise should contain a provision permitting the Board of Trustees
to designate where the power-house may
be located. Mr. McLachlan said, instead
of that, the board might prevent the location within certain districts, but not undertake to locate the establishment for the
company. President Cox suggested that

ike to locate the establishment for the cary. President Cox suggested that resolution be referred to the Committon Ordinance and Judictary, to be up. Further action on the subject deferred on president.

hred up. Further action on the subject was deferred one week.

Henry Finck uppeared before the board to ask about the proposed improvement of Bellefontaine drive, between Orange Grove and Fair Oaks avenues, for which preliminary stops were taken several weeks ago. It developed that, though a resolution of intention was passed, providing for grading the thoroughfaire and establishing a roadway forty feet wide and sidewalks fifteen feet wide, no advertisement had been made or notices posted. The reason given for dropping the matter was the discovery of a "jog" of five feet in the street, mar Fair Oaks avenue. It is proposed now to carry out the original plan, except as to the property which projects into the street five feet, and their the sidewalk may be only ten feet wide.

By resolution, the City Attorner

projects into the street five feet, and there the sidewalk may be only ten feet wide.

By resolution, the City Attorney was instructed to draw up an ordinance providing for the change of the name of Kansas street to Green street.

The Auditing and Finance Committee reported bills amounting to \$2768.82, which were ordered paid.

The protest against the sewers on Mary, Union and DeLacey streets will be heard next Monday.

Permission was granted to Dr. S. P. Swearingen to build a cottage on Kansas street, between Fair Oaks and Raymond.

The petition of property-owners to order Pasadema avenue improved by grading, curbing and guttering, between Colorado and Walnut streets, was granted.

Permission was given Godbor & Taylor to suspend a sign over the sidewalk in front of that firm's place of business.

A communication from the officers of La Fiesta de Los Angeles was read and placed on file.

The Street Superintendent reported \$10.25 received for permits during January.

Resports of the City Recorder for December and January were filed. For Lecember and January were filed. For December and January were filed for the convicted wine sellers is not yet collected.

By the report of the City Tax Collector it was shown that the receipts of his department in January amounted to \$3056.78.

The prayer of Fred Ward, manager of the Western Union telegraph office, for a concession permitting messenger boys to run their bicycles on the sidewalks during rainy weather, was denied.

An application was received from F. P. Bo

der.

Trustoe Weed brought up the subject of ompeoring a mounted policeman for Orange Grove avenue, and that vicinity. He thought that a man on horseback would be of no good for catching burglars and meak thieves, as the noise his animal would make on the pavement would give warning of his coming. He favored employing a spry policeman, who should make his rounds on a bicycle with noise-

less pneumatic tires. The board adjourned without taking action in this matter.

VISITING POMOLOGISTS.

The pomologists, to the number of sixty-dve, arrived this morning from Los Angeles, and were met at the Terminal station by Hon. T. P. Lukens and M. E. Wood, secretary of the Board of Traded by citizens, and when they had been loaded with visitors, a line of march was taken through the principal streets and to all the show places, including the Throop Institute. The drive was enjoyed hugely by the visitors, who were finally taken to the Hotel Green, where they had luncheon as guests of the Board of Trade. After luncheon the entertained and entertainers congregated in the pariors, where speechmaking was indulged in. President Keyes made a happy address of welcome, which was responded to by President Berckman of the Pomological Society; Treasurer B. J. Smith, J. H. Alexander, ex-Mayor of Augusta Ga.; Dr. Hexamer of New York, and Prof. L. R. Taft of Michigan University. When this pleasing ceremony was over, the visitors departed for Echo Mountain, chaperoned by Messrs. Lukens and Keyes.

ECHO MOUNTAIN NOTES.

The weather for February 4, was warm and fair, with the view clear for 150 miles.

Members of the State Senatorial Committee on State Buildings and Schools visited Echo Mountain yesterday with their wives and lady friends, and roamed about in enjoyable recreation after their inspection tour. C. F. Dunbar and family of Buffalo, N. Y., and Mr. and Mrs. C. J. Hamlin, Mrs. C. J. Tucker and daughter, Florence G. Tucker, Mrs. J. A. Hasbrouck of New York, formed an interested group on the bridle roads. Mr. Hamlin is the owner of the famous Robert J., with a record of 2:01½.

The Pomological Society of California, sixty strong, came up during the afternoon, and forty of the visitors stayed to see the heavens through the telescopes. The exclamations of delight as to the attractions and beauties of Echo Mountain were heard on every hand, and many expressed a determination to return for a more extended sojourn.

SANTA ANA BREVITIES.

It is remarkable how soon the water subsides in the streams this year, and it goes to show that the ground was pretty thoroughly dried out from the continued dry season last year. Santiago Creek, which, a few days ago, was a raging torrent, is now dry as a bone. There is yet a goed stream running in the river, but it is, of course, kept up from the melting snow in the mountains. The extraordinary amount of rain which fell has proven only a benefit, as the ground has absorbed it all, and is in prime condition.

A strike among the packers of the Tustin Fruit Association was reported this morning. It is said that the trouble arose through the packers being requested to sort the fruit without extra remuneration, which they refused to do and struck for a restoration of the prices paid last year, which were above those being offered this season. This is the rumor that is being circulated, but no definite particulars of the reasons for the strike have been learned.

Local Notes.

Santa Monica, Feb. 4.—(Special Correspondence.) The officers have arrived from the Presidio, San Francisco, and taken back with them Private Kilgore, a deserter, who had the bad taste to spend his stolen leisure here. He originated in this township, and was recognized at once and taken into custody. He made quite a start toward whittling a hole in the wooden foor of his cell in the town jail, but was removed before he was anywhere near liberty. Kilgore has had quite an experience in the deserting line. He made off in 1890, was captured two years later, and now has tried it again, with the probable result of very materially extending his term of service.

FIRST NATIONAL BANK ORGANI-ZATION COMPLETE.

Eastern Capitalists Behind the Gran Water Proposition—Prof. Harr Wagner's Liberal Offer— Cassidy's Dive.

SAN DIEGO, Feb. 4.—(Special Correspondence.) There was a contest between the factions in the First National Bank early in January. At the annual election Directors O. J. Stough and Philip Morse were displaced. Directors B. F. Arnold and C. B. Richards refused to qualify as directors, and, from January 9 until last Saturday, the bank was operated without a newly-organized board of directors. Organization is now complete, but the four leading citizens mentioned are not in the mamagement. During 1894, C. B. Richards was vice-president and general manager of the bank. During that time the bank earned 318,000 net profit, which is said to be a better showing than was made during the previous six years. Philip Morse, one of the retiring directors, is president of the Chamber of Commerce. B. F. Arnold is a member of one of the largest importing firms of the country, Arnold, Cheney & Co., of New York, and one of the wealthiest men on this Coast. O. J. Stough is a capitalist of prominence. J. Gruendike continues as president of the hank, while G. A. Garrettson succeeds Judge Richards as vice-president.

M San Diegans knew who the Eastern capitalists were behind the Grant water proposition, doubtless they would be highly gratified. For business reasons, the Grants very properly withhold from publication of mames. The Times is authoritatively informed as to who these capitalists are, and it will be a good thing for the whole councy if these men invest capital here by developing a water system, the merita of which are under discussion. Taxpayers want to go slow in the water matter, and the disposition is increasing to look before they leap.

THE SALOON ORDINANCE HELD TO BE UNCONSTITUTIONAL.

HERNCALIFORNIANEW

Evangelist Pratt Causing a Shaking-up in the Church—A Rich Gold Find on the Atlantic and Pacific.

SAN BERNARDINO, Feb. 4.-(Special matter of police regulations, and that county boards of supervisors have no authority to make restrictions upon trade based upon the exercise of police powers, the saloon men have claimed that the county ordinance, imposing a license upon them, is unconstitutional. Ordinance No. 68, under which salooms are licensed, is based upon police authority and undertakes to regulate the hours during which the business may be carried on, and prohibits the business on Sunday except by special permit. The Board of Supervisors saked District Aktorney F. B. Daley for an opinion on the matter. In his opinion he holds that under the Constitution and the rulings of the Supreme Court, the ordinance, being in the exercise of police powers, is void as far as the cities are concerned. He holds, however, that the county has a right to impose a tax upon the liquor business for revenue, and that, while he considers the present ordinance inoperative for the reasons given above, an ordinance can be passed by the Burt of Supervisors that will be valid for imposing a license on saloons in cities.

Never in Pomons has there been such a movement toward sidewalk construction as this season. Cement sidewalks are being laid in every part of town, and during the next few months there will be constructed, by order of the City Trustees, over 90,000 square feet of cement sidewalks on Third street, Garey and Holt avenues, Second and Louisa streets. We have never had a City Council that has done so much in the way of public improvement and at so little expense as the present city fathers.

There will be some important news in a few days relative to a \$50,000 brick and from block that is to be erected on Second street near Ellen street by a syndicate of Pomona men. The architect is busy with the plans, but, for divers reasons, the full information cannot be made public as yet.

Last evening Principal Cates furnished the following statement for publication:
LOS ANGELES, Feb. 4.—(To the Editor of The Times:) The trouble with the A-12 class has been amicably settled, and the class reinstated. The principal acknowledged that he was hasty in not allowing them consultation and deliberation. The condition of settlement was that the participants should come to the principal in his office afterward. This they did. They are William Harrison, William Innes, Walter Leeds, Brnest Oliver, Sylvan Susakind and Walter Umsted. These are the ones that the principal had decided upon, excepting the last named. Ward Chapman and Frank McBurney knew of it and favored it. Last Saturday a painter took down the flag from the tower and painted the flagstaff. The boys agreed to settle the bill. I wish to thank you for the oburtesies and impartial manner in which you have treated this whole affair.

An Interesting Paper Read by Judge

An Interesting Paper Read by Studge Van Dyke.

The Historical Society of Southern California held its regular monthly meeting in the city courtroom last evening.

The secretary, J. M. Guinn, read a paper prepared by Judge Walter Van Dyke entitled "Overland to Los Angeles by the Salt Lake Route in 1849." The

Dyke entitled "Overland to Los Angeles by the Salt Lake Route in 1849." The Judge, then a young lawyer just admitted to the bar, left Cleveland, O., by steamer for Chicago, where his company outfitted for their trip across the plains. Chicago then was an insignificant town with streets unpaved and no sidewalks except a few planks. From Chicago they struck out in wagons for the Mississippi River, which they reached at Burlington after a twelve-days' journey. They crossed the State of lowa by wagon train. "They left the Missouri River on the 24th of July, one of the last trains of the season. They reached Salt Lake City on the 5th of October, too late to cross the Sierra Nevadas that season. They had the alternative of wintering at Salt Lake or trying to reach California by a southern route. Fortunately they found a Mormon, Capt. Jefferson Hunt, who had just returned from the new Mormon settlement at San Bernardino. They engaged him as guide, and started for Los Angeles, which they reached the first week of February, 1850, just forty-five years ago. Los Angeles was a sleepy Mexican town. It offered no inducement to the argonauts to locate. The emigrants hastened northward to the gold fields as fast as their slow means of conveyance would carry them.

Mr. Hanna, an Oregon pioneer of 1852, gave his experience in crossing the plains. Mr. Barrows reported on the prospects of a museum building.

Mrs. Margaret Hughes was elected a member.

Great clearing-out of all Winter Jackets and Suits at less than cost of production.

The law of supply and demand regulates the price of all merchandise. This is just as true of cloaks and suits as it is of wheat, corn or stocks and bonds. Too many jackets at the wrong end of the year. There is only one way to save ourselves, and that is to make prices that will create a demand. Here are some of the prices we have made:

At \$3-Ladies' Waists.

Very handsome, fancily made, tight fitting waists: material used is a plain, all-wool cloth in quite a va-riety of winsome colorings; such waists at anything less than 85 are very much indeed out of the usual At \$3.50 and \$5-Ladies'

7dckets. These goods are in size 40 and up-ward only; that accounts for the very extreme lowness or the price; there are perhaps a dozen styles of genuine tailor-made coats in this lot, which would ordinarily sell from \$7.50 to \$12.

At \$10-Ladies' Coats.

A very large line of really beautiful garments, made and pressed by men tailors; the shapes and trimmings are the very latest as handed down by Paris and Berlin. There is not a garment in the lot that would not bring \$10 more than we ask in the month of December.

At \$5-Ladies' Suits. Good dependable cloths in all-wool and unton qualities: full tailor made and lined throughout: from \$10 a week ago to \$5 now should interest you.

At \$10-Ladies' Suits. The self-same goods that a week ago was shown you at \$18 and \$20; the style, the making, the material, the suits themselves are just as grod as you could possibly hope to

Notice

OF SALE OF PROPERTY DELINQUENT for the non-payment of assessment for improving Echandia street.

Notice is hereby given, that default having been made in the payment of the semi-annual interest and one-tenth of the principal on the hereinafter described bonds, being improvement bonds, series one, issued for the improving of Echandia street, around Prospect Park, in the city of Los Angeles, state of California, and Charles A. Marriner, the holder of the bonds, having demanded that the city treasurer proceed to advertise and sell the lots and parcels described in said honds and upon which pieces of property said bonds are a lien.

Now, therefore, I. W. A. Hartwell, city treasurer in and for the city of Los Angeles, state of California, hereby give notice that by virtue of the authority vested in me by law, unless said hereinafter described bonds, together with the interest, costs and penalties, are paid on or before February 20th, 1985, at 10 o'clock a.m., I will on that day and time offer for sale at public auction at the easterly door of the county courthouse in the city of Los Angeles, the hereinafter described lots and parcels of land upon which said bonds are a lien, and that I will sell the smallest quantity of said lots and parcels of land that will be taken by any person for the amount of the principal, interest, costs and penalties remaining due and unpaid upon said bonds.

The following is a description of the bonds, giving their number as well as the assessment number, for which they were issued, and a description of the property upon which they are a lien, the description being given by lot, block and tract, all being in the city of Los Angeles, and the amount set after the lot or tract is the amount of the principal of said bonds.

The National Bank of California is one of the few banks that successfully stood the shock of the late panic and maintained full coin payments right through.

The National Bank of California pays no interest on deposits in any form, offers no special inducements for business other than reliability when the customers exercise their right, to demandtheir money.

In this matter of loans it looks more to reliability than high rates of interest, and desires on cashe except from good and reliable parties, and then exacts good security, believing that no
